

Tracking the Proceeding

Throughout the proceeding, additional information about the project will be available from the Commission's Office of External Affairs, at (866) 208-FERC, or on the FERC website at www.ferc.gov using the "eLibrary" link as described above. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. For more information and to register, go to www.ferc.gov/docs-filing/esubscription.asp.

Intervention Deadline: 5:00 p.m. Eastern Time on December 6, 2023.

Dated: November 15, 2023.

Kimberly D. Bose,

Secretary.

White Pine Waterpower, LLC; Notice of Revised Schedule for White Pine Pumped Storage Project

This notice revises the Federal Energy Regulatory Commission's (Commission) schedule for processing White Pine Waterpower, LLC's license application for the White Pine Pumped Storage Project. A prior notice issued on May 11, 2023, identified an anticipated schedule for issuance of draft and final National Environmental Policy Act (NEPA) documents and a final order for the project. After the issuance of that notice, White Pine Waterpower, LLC indicated that it will be conducting a hydrogeologic study that provides data on local aquifer stratigraphy, groundwater elevation, and water quality needed to support the design of the project's water supply wellfield. White Pine Waterpower, LLC stated that it would file the study results by "November 2024". On October 26, 2023, Commission staff issued a letter requiring White Pine Waterpower, LLC to file the corresponding study results with the Bureau of Land Management

before filing them with the Commission by January 31, 2025. To account for the additional time needed for White Pine Waterpower, LLC to complete the studies and file the study results, the application will be processed according to the following revised schedule.

Notice of Ready for Environmental

Analysis: April 14, 2025

Draft NEPA Document: January 9, 2026

Final NEPA Document: July 24, 2026

In addition, in accordance with Title 41 of the Fixing America's Surface Transportation Act, enacted on December 4, 2015, agencies are to publish completion dates for all federal environmental reviews and authorizations. This notice identifies the Commission's anticipated schedule for issuance of the final order for the project, which is based on the revised issuance date for the final NEPA document. Accordingly, we currently anticipate issuing a final order for the project no later than:

Issuance of Final Order November 19, 2026

If a schedule change becomes necessary, an additional notice will be provided so that interested parties and government agencies are kept informed of the project's progress.

Dated: November 15, 2023.

Kimberly D. Bose,

Secretary.

[Docket No. AD23-9-000]

Reliability Technical Conference; Notice Inviting Post-Technical Conference Comments

On Thursday, November 9, 2023, the Federal Energy Regulatory Commission (Commission) convened its annual Commissioner-led Reliability Technical Conference to discuss policy issues related to the reliability of the Bulk-Power System, and the impact of the Environmental Protection Agency's proposed rule under section 111 of the Clean Air Act on electric reliability.¹

¹ New Source Performance Standards for Greenhouse Gas Emissions from New, Modified, and Reconstructed Fossil Fuel-Fired Electric Generating Units; Emission Guidelines for Greenhouse Gas Emissions from Existing Fossil Fuel-Fired Electric Generating Units; and Repeal of the Affordable Clean Energy Rule, 88 FR 33240 (proposed May 23, 2023) (to be codified at 40 CFR part 60).

All interested persons are invited to file post-technical conference comments to address issues raised during the technical conference and identified in the Second Supplemental Notice for this Technical Conference issued on October 30, 2023. For reference, the questions included in the Second Supplemental Notice are included below. Commenters need not answer all of the questions, but are encouraged to organize responses using the numbering and order in the below questions. Commenters are also invited to reference material previously filed in this docket, but are encouraged to avoid repetition or replication of their previous comments. Comments must be submitted on or before 30 days from the date of this Notice.

Comments, identified by docket number, may be filed electronically or paper-filed. Electronic filing through <https://www.ferc.gov> is preferred. Documents must be filed in acceptable native applications and print-to-PDF, but not in scanned or picture format. Instructions are available on the Commission's website: <http://www.ferc.gov/docs-filing/efiling.asp>.

Although the Commission strongly encourages electronic filing, documents may also be paper-filed. To paper-file, submissions sent via the U.S. Postal Service must be addressed to: Federal Energy Regulatory Commission, Office of the Secretary, 888 First Street NE, Washington, DC 20426. Submissions sent via any other carrier must be addressed to:

Federal Energy Regulatory Commission, Office of the Secretary, 12225 Wilkins Avenue, Rockville, Maryland 20852.

Notice, please contact:

Michael Gildea (Technical Information), Office of Energy Reliability, (202) 502-8420, Michael.Gildea@ferc.gov.

Gonzalo E. Rodriguez (Legal Information), Office of the General Counsel, (202) 502-8568, Gonzalo.Rodriguez@ferc.gov.

Dated: November 14, 2023.

Kimberly D. Bose,

Secretary.

Post Technical Conference Questions

1. State of Bulk Power System Reliability With a Focus on the Changing Resource Mix and Resource Adequacy

The transformation of the Bulk-Power System is resulting in significant changes to the nation's power supply portfolio. These changes include increased penetrations of inverter-based resources, the increased use and importance of natural gas generating units for system balancing, and the
