

rulemaking. EPA has considered these requests and has decided to reopen the comment period for an additional 15 days from the date of publication of today's rulemaking.

This reopening is for the limited purpose of public review and comment on the potential impacts of the final CSAPR on EPA's proposed rulemaking to approve Tennessee's Regional Haze SIP. EPA does not anticipate any impacts from the CSAPR on the proposed rulemaking on the Tennessee Regional Haze SIP. As noted in the CSAPR, EPA has not conducted any technical analysis to determine whether compliance with the CSAPR would satisfy Regional Haze Best Available Retrofit Technology (BART)-related requirements for electric generating units (EGUs). For that reason, EPA has neither made any determinations nor established any presumptions that compliance with the CSAPR satisfies BART-related requirements for EGUs. EPA intends to undertake a separate analysis to determine if compliance with the CSAPR would provide sufficient reductions to satisfy BART requirements for EGUs in accordance with Regional Haze Rule requirements for alternative BART compliance options as soon as practicable following official promulgation of the CSAPR.

Dated: July 15, 2011.

Gwendolyn Keyes Fleming,
Regional Administrator, Region 4.

Revisions to the California State Implementation Plan, Northern Sierra Air Quality Management District, Sacramento Metropolitan Air Quality Management District, and South Coast Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve revisions to the Northern Sierra Air Quality Management District (NSAQMD), Sacramento Metropolitan Air Quality Management District (SMAQMD), and South Coast Air Quality Management District (SCAQMD) portions of the California State Implementation Plan (SIP). These revisions concern volatile organic

compound (VOC) emissions from gasoline dispensing facilities, polyester resin operations, and spray booth facilities. We are proposing to approve local rules to regulate these emission sources under the Clean Air Act as amended in 1990 (CAA or the Act).

DATES: Any comments on this proposal must arrive by August 25, 2011.

ADDRESSES: Submit comments, identified by docket number EPA-R09-OAR-2011-0042, by one of the following methods:

1. *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the on-line instructions.

2. *E-mail:* steckel.andrew@epa.gov.

3. *Mail or deliver:* Andrew Steckel (Air-4), U.S. Environmental Protection Agency Region IX, 75 Hawthorne Street, San Francisco, CA 94105-3901.

Instructions: All comments will be included in the public docket without change and may be made available online at <http://www.regulations.gov>, including any personal information provided, unless the comment includes Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Information that you consider CBI or otherwise protected should be clearly identified as such and should not be submitted through <http://www.regulations.gov> or e-mail. <http://www.regulations.gov> is an "anonymous access" system, and EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send e-mail directly to EPA, your e-mail address will be automatically captured and included as part of the public comment. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: The index to the docket for this action is available electronically at <http://www.regulations.gov> and in hard copy at EPA Region IX, 75 Hawthorne Street, San Francisco, California. While all documents in the docket are listed in the index, some information may be publicly available only at the hard copy location (e.g., copyrighted material), and some may not be publicly available in either location (e.g., CBI). To inspect the hard copy materials, please schedule an appointment during normal business hours with the contact listed in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: David Grounds, EPA Region IX, (415) 972-3019, grounds.david@epa.gov.

SUPPLEMENTARY INFORMATION: This proposal addresses the following local rules: NSAQMD Rule 215, SMAQMD Rule 465, and SCAQMD Rules 1132 and 1162. In the Rules and Regulations section of this **Federal Register**, we are approving these local rules in a direct final action without prior proposal because we believe these SIP revisions are not controversial. If we receive adverse comments, however, we will publish a timely withdrawal of the direct final rule and address the comments in subsequent action based on this proposed rule. Please note that if we receive adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, we may adopt as final those provisions of the rule that are not the subject of an adverse comment.

We do not plan to open a second comment period, so anyone interested in commenting should do so at this time. If we do not receive adverse comments, no further activity is planned. For further information, please see the direct final action.

Dated: February 15, 2011.

Jared Blumenfeld,
Regional Administrator, Region IX.

Testing of Bisphenol A

AGENCY: Environmental Protection Agency (EPA).

ACTION: Advance notice of proposed rulemaking (ANPRM).

SUMMARY: Bisphenol A (BPA) (Chemical Abstracts Service Registry Number (CASRN) 80-05-7), a high production volume (HPV) chemical, is a reproductive, developmental, and systemic toxicant in animal studies and is weakly estrogenic. EPA is providing this ANPRM to request comment on requiring toxicity testing to determine the potential for BPA to cause adverse effects, including endocrine-related effects, in environmental organisms at low concentrations. EPA is also seeking comment on requiring environmental testing consisting of sampling and monitoring for BPA in surface water, ground water, drinking water, soil, sediment, sludge, and landfill leachate
