The instrument includes an additional module that is the only population-based measurement of Healthy People 2030 goals and health metrics reflecting the priorities of senior health leaders. The HCSDB is a population-based survey, not a healthcare encounter-based survey. As such, the HCSDB is the only survey able to measure access to care and other metrics for beneficiaries who may not be using the TRICARE health system due to barriers to care they encounter. This information collection, which began in 2008, continues to be of critical importance to DHA and Congress in assessing Military Health System and Managed Care Support Contractor performance by allowing for trending by various beneficiary categories over time.

Sexual assault, sexual harassment, and gender discrimination remain a major concern across the DoD and for members of Congress. In February 2004, the USD(P&R) testified before the Senate Armed Services Committee on the prevalence of sexual assault in the DoD and the programs and policies planned to address the issues. In accordance with legislative requirements, the USD(P&R) issued memoranda to the Services that provides DoD policy guidance on sexual assault that included a new standard definition, response capability, training requirements, response actions, and reporting guidance throughout the Department. The Sexual Assault Prevention and Response Office supported implementation of the new policy and requires data to assess the prevalence of sexual assault in the Department and the effectiveness of the programs they have implemented.

The WGR surveys assess the attitudes and opinions of military members on issues relating to sexual harassment, gender discrimination, sexual assault, as well as the culture and climate of the units/organizations in which individuals serve. The surveys provide the policy offices of the USD(P&R) with current data on (1) the positive and negative trends for professional and personal relationships between Service members; (2) the specific types of assault that have occurred and the number of times in the preceding year; (3) the effectiveness of DoD policies designed to improve professional relationships between male and female Service members; (4) the effectiveness of current processes for complaints, reports, and investigations; and, (5) specific issues related to sexual harassment, sexual assault, and gender discrimination that may inform the Department's prevention and response efforts.

Affected Public: Individuals and households.

Annual Burden Hours: 102,150.

Number of Respondents: 204,300.

Responses per Respondent: 1.

Annual Responses: 204,300.

Average Burden per Response: 30 minutes.

Frequency: Biennially.

The target population for the WGR includes active duty members serving in the Active component from the Army, Navy, Marine Corps, Air Force, and Coast Guard as well as Reserve component members in the Selected Reserve (in Reserve Units, Active Guard/Reserve (AGR/FTS/AR Title 10 and Title 32), and Individual Mobilization Augmentee (IMA) programs) from the Army National Guard, U.S. Army Reserve, U.S. Navy Reserve, U.S. Marine Corps Reserve, Air National Guard, U.S. Air Force Reserve, and Coast Guard Reserve. The Office of People Analytics (OPA) will administer the WGR survey via the web. The survey is administered via proprietary software developed by OPA's operations contractor. To reduce respondent burden, web-based surveys use "smart skip" technology to ensure respondents only answer questions that are applicable to them.
