BILLING CODE 4410-15-M

DEPARTMENT OF LABOR

Employment and Training Administration

Proposed Collection; Comment Request

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) (44 U.S.C. 3506(c)(2)(A)). This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Employment and Training Administration is soliciting comments concerning the proposed new collection

of data on the costs and usage of Workforce Investment Act (WIA) and Wagner Peyser services that do not require registration.

A copy of the proposed information collection request (ICR) can be obtained by contacting the office listed below in the **ADDRESSES** section of this notice.

DATES: Written comments must be submitted to the office listed in the addressee's section below on or before March 18, 2002.

ADDRESSES: James Aaron, Chief, Division of Performance and Results, Office of Financial and Administrative Management, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue, NW, Room N-4702, Washington, DC 20210, Telephone: (202) 693-2814 (this is not a toll-free number), E-mail: jaaron@doleta.gov.

SUPPLEMENTARY INFORMATION:

1. Background

The Department of Labor seeks to collect data regarding the costs and usage of Workforce Investment Act (WIA) and Wagner Peyser services that do not require participant registration. Current reporting systems do not capture this information because self and informational services do not require registration and are not part of the performance accountability provisions of the respective statutes. This fact has complicated the budget process by limiting DOL's capacity to develop unit cost projections. In addition, DOL does not have complete information on WIA service design. The information that is developed will be used to inform budget decisions and the WIA reauthorization process.

The data will consist of information already collected by state and local workforce development staff for their own management purposes and data collected from a probability sample of persons using self-service facilities. The principal goal of the data collection is to develop a national estimate of the number of job seekers who use informational, self, or staff facilitated services that do not require registration in primary One-Stop programs and related costs.

II. Review Focus

The Department of Labor is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
