

responsible operator as part of his/her normal business activities to minimize liabilities, maintain business records for tax and other purposes, obtain financial backing, and ensure a safe, efficient, and well-planned operation. The information may be submitted in the manner in which it is customarily maintained in the industry. The NPS does not require conformance with a standardized format. The reclamation plan and environmental report requirements [36 CFR § 9.36(a)(12) and (16), respectively] comprise the bulk of the information collection burden associated with these regulations. The NPS makes pertinent environmental information in park files available to prospective operators to aid in the preparation of proposed plans of operations.

Response to 60-Day Notice: On December 27, 1999, the NPS issued a notice in the **Federal Register** as to its intent to request an extension and revision to the information collection budget associated with the Service's minerals management program pursuant to 36 CFR Part 9 (see 64 FR 72358–72359). The comment period closed on February 25, 2000. The NPS received one comment that questioned whether the NPS had adequately assessed the burden for compliance with NEPA. While NEPA compliance is the responsibility of the NPS and not respondents, the Service's Part 9 regulations do require respondents to submit environmental data to the Service. As a result of the comment, the NPS reassessed the amount of time estimated for respondents to comply with the regulations. The NPS increased that time estimate to 160 hours plus 10% per respondent to more accurately account for time spent collecting and assembling data on the affected environment and possible resource impacts.

Leonard E. Stowe,

Information Collection Officer.
