

Also, in certain circumstances, the Commission requires the applicant to provide copies of their agreements. We do not anticipate that these revisions will impact the collection filing burden.

The Commission therefore seeks approval for a revision to its currently approved information collection on FCC Form 608 to revise FCC Form 608 accordingly.

Needs and Uses: The telecommunications relay service (TRS) program enables access to the nation's telephone network by persons with hearing and speech disabilities. Between 2008 and 2011, the Commission adopted rules in three separate orders related to the telephone numbering system and enhanced 911 (E911) services for users of two forms of Internet-based TRS: Video Relay Service (VRS); and Internet Protocol Relay service (IP Relay). See document FCC 08–151, Report and Order and Further Notice of Proposed Rulemaking (First

Numbering Order), published at 73 FR 41286, July 18, 2008; document FCC 08–275, Second Report and Order and Order on Reconsideration (Second Numbering Order), published at 73 FR 79683, December 30, 2008; and document FCC 11–123, Report and Order (iTRS Toll Free Order), published at 76 FR 59551, September 27, 2011.

The rules adopted in these three orders have the following information collection requirements:

(A) Routing Information. VRS and IP Relay providers must obtain and retain current routing information from their registered users.

(B) Provision of Routing Information. VRS and IP Relay providers must provision and maintain their registered users' routing information to the TRS Numbering Directory.

(C) Registered Location. VRS and IP Relay providers must obtain from each newly registered user the physical location at which the service will be utilized (the user's Registered Location) and offer their registered users one or more methods of updating their physical location.

(D) Provision of Registered Location. Each VRS and IP Relay provider must place its registered users' Registered Location and certain callback information into, or make that information available through, Automatic Location Information (ALI) databases across the country.

(E) User Notification. Every VRS or IP Relay provider must include an advisory on its Web site and in any promotional materials addressing numbering and E911 services for VRS or IP Relay.

(F) Affirmative Acknowledgements. VRS and IP Relay providers must obtain and keep a record of affirmative acknowledgement from each of their registered users of having received and understood the user notification.

(G) Ascertaining Registration Status of VRS or IP Relay User. Every VRS and IP Relay provider must verify whether a dial-around user is registered with another provider. Because there is only one IP Relay provider, dial-around service is not used with IP Relay at this time.

(H) Verifying Registration and Eligibility Information. Every VRS and IP Relay provider must institute procedures to verify the accuracy of registration information, and include a self-certification component requiring consumers to verify that they have a disability necessitating their use of TRS.

(I) Commission Approval for the Pass Through of Numbering Costs. Each VRS or IP Relay provider wishing to pass through certain numbering-related costs

to its users must obtain Commission approval to do so.

(J) Information Sharing After a Change in Default Providers. Each VRS provider that provides equipment to a consumer must make available to other VRS providers enough information about that equipment to enable another VRS provider selected as the consumer's default provider to perform all of the functions of a default provider.
