

determination is effective on June 6, 2025. FAA's determination on an airport's noise exposure map is limited to a finding that the noise exposure map was developed in accordance with the 49 U.S.C. sections 47503 and 47506 and procedures contained in 14 CFR part 150, Appendix A. FAA's acceptance of an NEM does not constitute approval of the applicant's data, information or plans, or a commitment to approve a noise compatibility program or to fund the implementation of that program. If questions arise concerning the precise relationship of specific properties within noise exposure contours depicted on a noise exposure map, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours or in interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of 49 U.S.C. 47506. These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under 14 CFR part 150 or through FAA review and acceptance of a noise exposure map. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the map depicting properties on the surface rests exclusively with the airport operator that submitted a noise exposure map or with those public and planning agencies with which consultation is required under 49 U.S.C section 47503. The FAA relied on the certification by the airport operator, under of 14 CFR 150.21 that the required consultations and opportunity for public review has been accomplished during the development of the noise exposure maps. Copies of the noise exposure map and supporting documentation and the FAA's evaluation of the noise exposure maps are available for examination at the following locations:

1. Federal Aviation Administration, Los Angeles Airports District Office, 777 South Aviation Boulevard, Suite 150, El Segundo, California 90045.

2. Camarillo Airport, County of Ventura, 555 Airport Way, Suite B, Camarillo, California 93010.

Petitioner: 21 Air Inc.

Sections of 14 CFR Affected: §§ 121.438(b) and 121.652(a).

Description of Relief Sought: Petitioner seeks an exemption from §§ 121.438(b) and 121.652(a) to allow their pilots with less than 75 hours in the Boeing 757 (B-757) or 75 hours in the Boeing 767 (B-767), respectively, be paired together provided that the pilot in command (PIC) or second in command (SIC) must have at least 75 hours of combined line operating flight time in the B-757 and B-767. The exemption would also allow PIC flight time logged either in the B-757 or B-767 to meet the 100 hours of PIC time required in order to avoid being subject to higher minimums in either aircraft type once the combined flight time exceeds 100 hours. Petitioner does not currently operate any B-757s.
