

Title: Vessel Monitoring System (VMS) Requirement in the Pacific Coast Groundfish Fishery.

OMB Control Number: 0648–0573.

Form Number(s): NA.

Type of Request: Regular submission (extension of a current information collection).

Number of Respondents: 1,000.

Average Hours Per Response: VMS installation and activation reports, and exemption reports, 5 minutes; gear declaration reports, 4 minutes.

Burden Hours: 771.

Needs and Uses: This request is for extension of a currently approved information collection.

NOAA has established large-scale depth-based management areas, referred to as Groundfish Conservation Areas (GCAs), where groundfish fishing is prohibited or restricted. These areas were specifically designed to reduce the catch of species while allowing healthy fisheries to continue in areas and with gears where little incidental catch of overfished species is likely to occur. Because NOAA needs methods to effectively enforce area restrictions, certain commercial fishing vessels are required to install and use a vessel monitoring system (VMS) that automatically sends hourly position reports. Exemptions from the reporting requirement are available for inactive vessels or vessels fishing outside the monitored area. The vessels are also required to declare what gear will be used.

To ensure the integrity of the GCAs and Rockfish Conservation Areas (RCA), a pilot VMS program was implemented on January 1, 2004. The pilot program required vessels registered to Pacific Coast groundfish fishery limited entry permits to carry and use VMS transceiver units while fishing off the coasts of Washington, Oregon and California. On January 1, 2007, the VMS program coverage was expanded on to include all open access fisheries in addition to the limited entry fisheries.

Affected Public: Business or other for-profit organizations.

Frequency: Every four years, annually and on occasion.

Respondent's Obligation: Mandatory.

This information collection can be viewed at <http://www.reginfo.gov>. Follow the instructions to review Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to OIRA_Submission@omb.eop.gov or fax no. (202) 395–5806.

Dated: February 20, 2014.

Pure Magnesium From the People's Republic of China: Preliminary Results of Antidumping Duty Administrative Review; 2012–2013

AGENCY: Enforcement and Compliance, formerly Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (“Department”) is conducting an administrative review of the antidumping duty order on pure magnesium from the People's Republic of China (“PRC”). The period of review (“POR”) is May 1, 2012, through April 30, 2013. This review covers one PRC company, Tianjin Magnesium International, Co., Ltd. (“TMI”) and Tianjin Magnesium Metal Co., Ltd. (“TMM”) (collectively “TMI/TMM”).¹ The Department preliminarily finds that TMI/TMM did not have reviewable entries during the POR. We invite interested parties to comment on these preliminary results.

DATES: *Effective Date:* February 25, 2014.

FOR FURTHER INFORMATION CONTACT: Laurel LaCivita or Brendan Quinn, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington DC 20230; telephone: (202) 482–4243 or (202) 482–5848, respectively.

Scope of the Order

Merchandise covered by the order is pure magnesium regardless of chemistry, form or size, unless expressly excluded from the scope of the order. Pure magnesium is a metal or alloy containing by weight primarily the element magnesium and produced by decomposing raw materials into magnesium metal. Pure primary magnesium is used primarily as a

chemical in the aluminum alloying, desulfurization, and chemical reduction industries. In addition, pure magnesium is used as an input in producing magnesium alloy. Pure magnesium encompasses products (including, but not limited to, butt ends, stubs, crowns and crystals) with the following primary magnesium contents:

(1) Products that contain at least 99.95% primary magnesium, by weight (generally referred to as “ultra pure” magnesium);

(2) Products that contain less than 99.95% but not less than 99.8% primary magnesium, by weight (generally referred to as “pure” magnesium); and

(3) Products that contain 50% or greater, but less than 99.8% primary magnesium, by weight, and that do not conform to ASTM specifications for alloy magnesium (generally referred to as “off-specification pure” magnesium).

“Off-specification pure” magnesium is pure primary magnesium containing magnesium scrap, secondary magnesium, oxidized magnesium or impurities (whether or not intentionally added) that cause the primary magnesium content to fall below 99.8% by weight. It generally does not contain, individually or in combination, 1.5% or more, by weight, of the following alloying elements: aluminum, manganese, zinc, silicon, thorium, zirconium and rare earths.

Excluded from the scope of the order are alloy primary magnesium (that meets specifications for alloy magnesium), primary magnesium anodes, granular primary magnesium (including turnings, chips and powder) having a maximum physical dimension (i.e., length or diameter) of one inch or less, secondary magnesium (which has pure primary magnesium content of less than 50% by weight), and remelted magnesium whose pure primary magnesium content is less than 50% by weight.

Pure magnesium products covered by the order are currently classifiable under Harmonized Tariff Schedule of the United States (“HTSUS”) subheadings 8104.11.00, 8104.19.00, 8104.20.00, 8104.30.00, 8104.90.00, 3824.90.11, 3824.90.19 and 9817.00.90. Although the HTSUS subheadings are provided for convenience and customs purposes, our written description of the scope is dispositive.

Background

On May 1, 2013, the Department published a notice of opportunity to request an administrative review of the antidumping duty order on pure magnesium from the PRC for the period

¹ The Department initiated the instant review on both TMM and TMI. See *Initiation of Antidumping and Countervailing Duty Administrative Reviews and Request for Revocation in Part*, 78 FR 38924 (June 28, 2013) (“Initiation Notice”). In the interim, for the prior 2011–2012 review of the order, the Department determined TMM and TMI to be collapsed and treated as a single entity for purposes of the proceeding. See *Pure Magnesium From the People's Republic of China: Final Results of Antidumping Duty Administrative Review; 2011–2012*, 79 FR 94 (January 2, 2014) and accompanying Issues and Decision Memorandum at Comment 5. As this collapsing determination remains unchallenged in this review, the instant preliminary results of this review cover the single TMM/TMI entity.
