Abstract: The New Source Performance Standards (NSPS) for Oil and Natural Gas Production and Natural Gas Transmission and Distribution (40

CFR part 60, subpart OOOO) apply to oil and natural gas facilities that commence construction, modification or reconstruction after August 23, 2011 and on or before September 19, 2015, that are involved in the extraction and production of oil and natural gas, as well as for the processing, transmission, and distribution of natural gas. Affected facilities in the crude oil and natural gas source category that commence construction, modification, or reconstruction after September 18, 2015 are instead subject to subpart OOOOa (40 CFR 60, subpart OOOOa). In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

Form Numbers: None.

Respondents/affected entities: Oil and natural gas production and natural gas transmission and distribution facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart OOOO).

Estimated number of respondents: 532 (total).

Frequency of response: Semiannually and annually.

Total estimated burden: 69,300 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$9,430,000 (per year), which includes \$1,220,000 for annualized capital/startup and/or operation & maintenance costs.

Changes in the estimates: There is no change in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) no new facilities will become subject to this regulation, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup or

operation and maintenance (O&M) costs.

Director, Regulatory Support Division.
