

proposed or final rules, to withdraw rules pending publication with OFR, and to consider postponing for 60 days from the date of the memorandum, the effective date of rules already published in the **Federal Register**. The purpose of the memorandum is to implement the President's plan to manage the Federal regulatory process at the outset of the Administration by providing the opportunity for the President's new designees or appointees to review all new and pending rules.

Because OFR published the HIPAA NPRM prior to the effective withdrawal of rules provided for in the memorandum, the HIPAA NPRM remains publicly available in the **Federal Register** and open for public comment. However, due to the proximity in time between the publication of the HIPAA NPRM and the Regulatory Freeze Memorandum, the public may need clarification that the HIPAA NPRM is available for public comment and additional time to review the proposals and submit comments.

Therefore, to maximize the opportunity for the public to provide meaningful input to inform policy development, the Department is extending the comment period to May 6, 2021.

Norris Cochran,

Acting Secretary, Department of Health and Human Services.

BILLING CODE 4153-01-P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MB Docket No. 21-9; RM-11872; DA 21-40; FRS 17397]

Television Broadcasting Services Tulsa, Oklahoma

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission has before it a petition for rulemaking filed by KTUL Licensee, LLC, (Licensee), licensee of KTUL, channel 10, Tulsa, Oklahoma, requesting the substitution of channel 14 for channel 10 at Tulsa in the DTV Table of Allotments. The Licensee states that the Commission has recognized that VHF channels have certain propagation characteristics which may cause reception issues for some viewers, and also that reception of VHF signals require larger antennas that are generally not well suited to the mobile

applications expected under flexible use, relative to UHF channels. KTUL has received numerous complaints from viewers unable to receive the Station's over-the-air signal, despite being able to receive signals from other stations. Licensee further states that with respect to operations on channel 14 and nearby land mobile services, it has determined that it can install the appropriate mask filter and antenna needed to avoid interference to land mobile operations. In addition, operation on channel 14 will not result in any predicted loss of service and would result in a substantial increase in signal receivability for KTUL viewers.

DATES: Comments must be filed on or before April 9, 2021 and reply comments on or before April 26, 2021.

ADDRESSES: Federal Communications Commission, Office of the Secretary, 45 L Street NE, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve counsel for petitioner as follows: Paul A. Cicelski, Esq., Lerman Senter PLLC, 2001 L Street NW, Suite 400, Washington, DC 20036.
