SUPPLEMENTARY INFORMATION:

I. Background

The Occupational Employment Statistics (OES) program has been funded to collect and produce objective and reliable information on occupational employment and wages for green jobs at the establishment level. This is to be conducted through a special employer survey. This work is necessary to meet the publication objective outlined in the FY2010 Congressional Appropriation.

The Bureau of Labor Statistics (BLS) presented its approach to measuring green jobs and published its final definition of green jobs in the September 21, 2010, **Federal Register** (75 FR 57506). The measurement approach includes two surveys: one on jobs related to producing green goods and services, and one on jobs related to using environmentally friendly production processes and practices.

The latter approach will be accomplished through a special employer survey. This information collection request is for the Green Technologies and Practices (GTP) Survey. This survey includes collecting the current employment for the establishment; collecting information on the use of environmentally friendly production processes within the establishment; and collecting the number, occupation, and wages paid to employees of the establishment performing environmentally friendly activities.

II. Current Action

Office of Management and Budget clearance is being sought for the "BLS Green Technologies and Practices Survey." The goal of BLS and its OES program is to produce economic statistics on employment related to the use of environmentally friendly technologies and practices across the U.S. economy. Using its business establishment register, the OES program intends to survey establishments about these green activities and the associated employment. The survey will identify employers performing green activities, determine whether they have any employees performing tasks associated with these activities, gather information to classify those employees according to the Standard Occupational Classification (SOC) system, and collect wage rate information.

III. Desired Focus of Comments

The Bureau of Labor Statistics is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary

for the proper performance of the functions of the agency, including whether the information will have practical utility.

- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.
- Enhance the quality, utility, and clarity of the information to be collected.

- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
