The CMMC Level 2 certification assessment process is conducted by Certified Assessors, employed by CMMC Third-Party Assessment Organizations (C3PAOs). During the assessment process, Organizations Seeking Certification's hire C3PAOs to conduct the third-party assessment required for certification. The CMMC Certified Assessors upload assessment data: pre-assessment and planning material (date and level of the assessment; C3PAO name and unique identifier; name and business contact information for each Assessor; all industry CAGE codes associated with the information systems addressed by the CMMC Assessment Scope; name, date, and version of the system security plan (SSP); the Title 32 program rule (32 CFR part 170)), final assessment reports (assessment result for each requirement objective; POA&M usage and compliance, as applicable; and list of artifact names, the return values of the hashing algorithm, and the hashing algorithm used), and appropriate CMMC certificates of assessment (certification date, as applicable) into the CMMC instantiation of eMASS.

The CMMC Level 3 certification assessment process is conducted by the Defense Contract Management Agency (DCMA) Defense Industrial Base Cybersecurity Assessment Center (DIBCAC). DCMA DIBCAC assessors upload assessment data: pre-assessment and planning material (date and level of the assessment; name and business contact information for each Assessor; all industry CAGE codes associated with the information systems addressed by the CMMC Assessment Scope; name, date, and version of the system security plan (SSP); the Title 32 program rule (32 CFR part 170)), final assessment reports (assessment result for each requirement objective; POA&M usage and compliance, as applicable; and list of artifact names, the return values of the hashing algorithm, and the hashing algorithm used), and appropriate CMMC certificates of assessment (certification date, as applicable) into the CMMC instantiation of eMASS.

The Accreditation Body provides the CMMC Program Management Office with current data on C3PAOs and Assessors, including authorization and accreditation records and status using the CMMC instantiation of eMASS.

Needs and Uses: The CMMC Program provides for the assessment of contractor implementation of cybersecurity requirements to enhance confidence in contractor protection of unclassified information within the DoD supply chain. CMMC contractual requirements are implemented under a Title 48 acquisition rule, with associated rulemaking for the CMMC Program requirements (e.g., CMMC Scoring Methodology, certificate issuance, information accessibility) under a Title 32 program rule (32 Code of Federal Regulations (CFR) part 170). The Title 32 program rule includes two separate information collection requests (ICR), this one for the CMMC Program and one for CMMC eMASS.

This information collection is necessary to support the implementation of the CMMC assessment process for Levels 2 and 3 certification assessment, as defined in 32 CFR 170.17 and 170.18 respectively.

Level 2 Certification Assessments

The Level 2 certification assessment process is conducted by CMMC Certified Assessors, employed by CMMC Third-Party Assessment Organizations (C3PAOs). During the assessment process, Organizations Seeking Certification (OSCs) hire C3PAOs to conduct the third-party assessment required for certification. The Level 2 Certification Assessment information collection reporting and recordkeeping requirements are included in the Title 32 program rule with the exception of the requirement for the OSC to upload the affirmation in SPRS that is included in the Title 48 acquisition rule. Additionally, the information collection requirements for the CMMC instantiation of eMASS are addressed in a separate Title 32 program rule information collection request (ICR). OSCs follow the procedures defined in 32 CFR 170.17 to prepare for Level 2 certification assessment. Certified Assessors assigned by C3PAOs follow the requirements and procedures defined in 32 CFR 170.17 to conduct CMMC assessments on defense contractor information systems to determine conformance with the information safeguarding requirements associated with Level 2 certification assessment to validate implementation of the 110 security requirements from NIST SP 800–171 Rev 2. C3PAOs must generate and collect pre-assessment and
