#### SUPPLEMENTARY INFORMATION:

##### I. Background

The IAEA works with its Member States and multiple partners worldwide to promote safe, secure and peaceful nuclear technologies. The IAEA established and maintains an international standard, Regulations for the Safe Transport of Radioactive Material (TS-R-1), to promote the safe and secure transportation of radioactive material. The IAEA periodically reviews, and as deemed appropriate revises, its Regulations for the Safe Transport of Radioactive Material to reflect new information and accumulated experience. The DOT is the U.S. competent authority before the IAEA for radioactive material transportation matters. The NRC provides technical support to the DOT in this regard, particularly with regard to Type B and fissile transportation packages.

The IAEA recently initiated a review cycle for its regulations. To assure opportunity for public participation in the international regulatory development process, the DOT and the NRC are soliciting comments and information concerning issues or problems with the IAEA Regulations.

The focus of this solicitation is to identify issues or problems with the 2009 of TS-R-1. Although IAEA has not yet published the 2009 Edition of TS-R-1, a draft version suitable for this review process is available on <http://www.regulations.gov> (use the search tool to locate the docket number for this notice). The IAEA has already identified a number of issues with that draft; a table showing draft proposed changes to the 2009 Edition is also available through this docket at <http://www.regulations.gov>.

It would be helpful to recommend potential changes or solutions to resolve any identified issues or problems. This information will assist the DOT and the NRC to consider the full range of views and alternatives as the agencies develop the proposed issues the United States will submit to the IAEA.

##### II. Public Participation

Proposals must be submitted in writing (electronic file in Microsoft Word format preferred).

The DOT and the NRC will review the proposed issues and identified problems. Proposed issues and identified problems from all Member States and International Organizations will be initially considered at an IAEA Transport Safety Standards Committee (TRANSSC) Meeting to be convened by IAEA on October 5-9, 2009, in Vienna, Austria. Prior to that meeting, the DOT and the NRC will consider convening a public meeting to discuss the U.S. proposals submitted to the IAEA.

Issued in Washington, DC, on May 28, 2009.
