In developing the regional supplements, the Corps recognized that a single national manual is unable to consider regional differences in climate, geology, soils, hydrology, plant, and animal communities, and other factors that are important to the identification and functioning of wetlands. The wetland indicators and guidance provided in the regional supplements are designed to be used in combination with the Corps Manual to identify wetland waters of the United States.

Call for Nominations is issued annually to request nominations for the Silver Jackets State Team of the Year award. Because the Silver Jackets program is not a USACE-only program, but an intergovernmental partnership program, incorporating input and feedback from our State partners is

critical to recognizing the accomplishments of the teams. There are two information collection requests associated with the Silver Jackets State Team of the Year award. Respondents to both are State government employees who partner with USACE on Silver Jackets State Teams. Silver Jackets is an innovative program that provides States with an opportunity to consistently coordinate with multiple state, federal, and sometimes tribal and local agencies to learn from one another and implement flood risk reduction. The first information collection request is for the nomination of teams for consideration. The second information collection request is to cast votes for the winning team from among those teams that were previously nominated. Eng Form 6128, which will be submitted electronically, is the nomination form. The second information collection request does not have an associated form. In this information collection request, each Silver Jackets State Team is provided with a number of votes that they can cast for one or more of the previously nominated teams, and voting is conducted through a website.
