

The petitioner claims that it compared non-U.S. certified 2006 Lamborghini Gallardo roadster passenger cars manufactured between January 1, 2006 and August 31, 2006 to their U.S.-certified counterparts, and found the vehicles to be substantially similar with respect to compliance with most FMVSS.

AMC submitted information with its petition intended to demonstrate that non-U.S. certified 2006 Lamborghini Gallardo roadster passenger cars manufactured between January 1, 2006 and August 31, 2006, as originally manufactured, conform to many FMVSS in the same manner as their U.S. certified counterparts, or are capable of being readily altered to conform to those standards.

Specifically, the petitioner claims that non-U.S. certified 2006 Lamborghini Gallardo roadster passenger cars manufactured between January 1, 2006 and August 31, 2006 are identical to their U.S. certified counterparts with respect to compliance with Standard Nos. 102 *Transmission Shift Lever Sequence, Starter Interlock, and Transmission Braking Effect*, 103 *Windshield Defrosting and Defogging Systems*, 104 *Windshield Wiping and Washing Systems*, 106 *Brake Hoses*, 109 *New Pneumatic Tires*, 113 *Hood Latch System*, 116 *Motor Vehicle Brake Fluids*, 118 *Power-Operated Window, Partition, and Roof Panel Systems*, 124 *Accelerator Control Systems*, 135 *Passenger Car Brake Systems*, 201 *Occupant Protection in Interior Impact*, 202 *Head Restraints*, 204 *Steering Control Rearward Displacement*, 205 *Glazing Materials*, 206 *Door Locks and Door Retention Components*, 207 *Seating Systems*, 212 *Windshield Mounting*, 214 *Side Impact Protection*, 216 *Roof Crush Resistance*, 219 *Windshield Zone Intrusion*, 225 *Child Restraint Anchorage Systems*, and 302 *Flammability of Interior Materials*.

In addition, the petitioner claims that the vehicles comply with the Bumper Standard found in 49 CFR Part 581.

The petitioner also contends that the vehicles are capable of being readily altered to meet the following standards, in the manner indicated:

Standard No. 101 *Controls and Displays*: installation of a U.S.-model instrument cluster and associated hardware and software, or modification of the existing instrument cluster to meet the requirements of this standard.

Standard No. 108 *Lamps, Reflective Devices and Associated Equipment*: inspection of all vehicles and installation, on vehicles that are not already so equipped, of U.S.-model

components to meet the requirements of this standard.

Standard No. 110 *Tire Selection and Rims*: installation of a tire information placard.

Standard No. 111 *Rearview Mirrors*: installation of a U.S.-model passenger side rearview mirror, or inscription of the required warning statement on the face of that mirror.

Standard No. 114 *Theft Protection*: installation of a supplemental key warning buzzer, or installation of U.S.-version software to meet the requirements of this standard.

Standard No. 208 *Occupant Crash Protection*: inspection of all vehicles and replacement of any non U.S.-model seat belts, air bag control units, air bags, and sensors with U.S.-model components on vehicles that are not already so equipped; and (b) installation of U.S.-version software to ensure that the seat belt warning system meets the requirements of this standard.

The petitioner states that the crash protection system used in these vehicles consists of dual front airbags and combination lap and shoulder belts at the front outboard seating positions. The seat belt systems are described as being self-tensioning, and capable of being released by means of a single red push-button.

Standard No. 209 *Seat Belt Assemblies*: inspection of all vehicles and replacement of any non U.S.-model seat belts with U.S.-certified model seat belts.

Standard No. 210 *Seat Belt Assembly Anchorages*: inspection of all vehicles and replacement of any non U.S.-model seat belts anchorage components with U.S.-model components.

Standard No. 301 *Fuel System Integrity*: inspection of all vehicles and replacement of any non U.S.-model fuel system components with U.S.-model components.

The petitioner additionally states that a vehicle identification plate must be affixed to the vehicles near the left windshield post to meet the requirements of 49 CFR Part 565.

All comments received before the close of business on the closing date indicated above will be considered, and will be available for examination in the docket at the above addresses both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Authority: 49 U.S.C. 30141(a)(1)(A) and (b)(1); 49 CFR 593.8; delegations of authority at 49 CFR 1.50 and 501.8.

Issued on: June 20, 2008.

Jeffrey Giuseppe,

Acting Director, Office of Vehicle Safety Compliance.
