#### Description of Petition for Rulemaking

In its Petition for Rulemaking dated November 12, 2013, the National Mariners Association (NMA) asserts that the Coast Guard has not provided adequate workplace safety and health measures comparable to the workplace safety and health measures of the Occupational Safety and Health Administration (OSHA). The NMA views it as the Coast Guard's responsibility, under the Occupational Safety and Health Act of 1970, to provide regulations, comparable to the workplace safety and health regulations of OSHA, in order to protect the safety and health of merchant mariners.

#### Workplace Safety and Health for Merchant Mariners Determination

The NMA requests that the Coast Guard establish adequate workplace safety and health regulations, comparable to OSHA workplace safety and health regulations, in order to

protect merchant mariners. The petitioner identifies several workplace related safety and health issues where the petitioner has determined that merchant mariners are not currently protected.

#### Request for Comments

We invite you to review the petition in the docket and submit relevant comments, including comments on whether a rulemaking would be beneficial, or not. The Coast Guard has determined that public comments are needed to aid in the determination whether or not a rulemaking is appropriate. The Coast Guard will consider the petition, any comments received from the public, and other information to determine whether or not to initiate the requested rulemaking.

This notice is issued under authority of 5 U.S.C. 552(a) and 33 CFR 1.05–20.

#### Endangered and Threatened Wildlife and Plants; Designation of Critical Habitat for the Florida Leafwing and Bartram's Scrub-Hairstreak Butterflies

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Proposed rule; revision and reopening of comment period.

**SUMMARY:** We, the U.S. Fish and Wildlife Service (Service), announce the reopening of the public comment period on the August 15, 2013, proposed designation of critical habitat for the Florida leafwing (*Anaea troglodyta floridaalis*) and Bartram's scrub-hairstreak (*Strymon acis bartrami*) butterflies under the Endangered Species Act of 1973, as amended (Act). We are proposing to revise the previously proposed critical habitat for these species by including hydric pine flatwoods in their primary constituent elements and by increasing the size of the Everglades National Park Unit for each butterfly to 7,994 acres (ac) (3,235 hectares (ha)). In total, we are proposing

to designate as critical habitat 10,561 ac (4,273 ha) in four units for the Florida leafwing, and 11,539 ac (4,670 ha) in seven units for the Bartram's scrub-hairstreak; all units are located within Miami-Dade and Monroe Counties, Florida. We also announce the availability of a draft economic analysis (DEA) and an amended required determinations section for the proposed determination. We are reopening the comment period to allow all interested parties an opportunity to comment simultaneously on the revised proposed rule, the associated DEA, and the amended required determinations section. Comments previously submitted need not be resubmitted, as they will be fully considered in preparation of the final rule.

**DATES:** We will consider comments received or postmarked on or before June 9, 2014. Comments submitted electronically using the Federal eRulemaking Portal (see **ADDRESSES** section, below) must be received by 11:59 p.m. Eastern Time on the closing date.

#### SUPPLEMENTARY INFORMATION:

##### Public Comments

We will accept written comments and information during this reopened comment period on our revised proposed designation of critical habitat for the Florida leafwing and Bartram's scrub-hairstreak, our DEA of the proposed designation, and the amended required determinations provided in this document. We will consider information and recommendations from all interested parties. We are particularly interested in comments concerning:

(1) The reasons why we should or should not designate habitat as “critical habitat” under section 4 of the Act (16 U.S.C. 1531 *et seq.*), including whether there are threats to the species from human activity, the degree of which can be expected to increase due to the designation, and whether that increase in threat outweighs the benefit of designation such that the designation of critical habitat is not prudent.

(2) Specific information on:

(a) The distribution of the Florida leafwing and Bartram's scrub-hairstreak;

(b) The amount and distribution of Florida leafwing and Bartram's scrub-hairstreak habitat; and

(c) What areas occupied by either or both species at the time of listing contain features essential for the conservation of the species and why; and

(d) What areas not occupied at the time of listing are essential to the conservation of the species and why.

(3) Land use designations and current or planned activities in the subject areas and their probable impacts on proposed critical habitat of either or both species.

(4) Information on the projected and reasonably likely impacts of climate change on the Florida leafwing and Bartram's scrub-hairstreak and proposed critical habitat.

(5) Any probable economic, national security, or other relevant impacts of designating any area that may be included in the final designation; in particular, the benefits of including or excluding areas that exhibit these impacts.

(6) Information on the extent to which the description of economic impacts in the DEA is a reasonable estimate of the likely economic impacts.
