

implementing NEPA. CEQ regulations at title 40, section 1502.9(c) of the Code of Federal Regulations (40 CFR 1502.9(c)) require Federal agencies to prepare a supplement to an EIS when an agency makes substantial changes in the proposed action that are relevant to environmental concerns or there are significant new circumstances or information relevant to environmental concerns and bearing on the proposed action or its impacts. DOE regulations at 10 CFR 1021.314(c) direct that when it is unclear whether a supplement to an EIS is required, an SA be prepared to determine whether an EIS should be supplemented; a new EIS should be prepared; or no further NEPA documentation is required. The SA analyzed whether this transportation and storage (change of NpO₂ storage location from ORNL to ANL-W) is substantially relevant to environmental concerns and whether a supplement to the NI PEIS should be prepared. The environmental impacts of shipment of NpO₂ from SRS were analyzed in the NI PEIS for several storage locations including FDPF and CPP-651 storage vault at the Idaho National Engineering and Environmental Laboratory (INEEL). The ANL-W site is in close proximity of FDPF and CPP-651. The transportation route and distance from SRS to ANL-W is virtually identical to FDPF/CPP-651. Because the impacts of shipment to and storage at FDPF/CPP-651 at INEEL were analyzed in the NI PEIS, the impacts for shipment to and storage at ANL-W are expected to be virtually the same. In addition, ANL-W currently stores SNM and meets the security requirements for storage of SNM. This change of storage location for NpO₂ would obviate the need for costly security upgrades at ORNL.

Decision

On the basis of the SA and the analyses conducted in NI PEIS, DOE has determined that the proposed change in storage location of NpO₂ from REDC to ANL-W would not require further review under NEPA. The impacts due to relocation and storage of NpO₂ would be no greater than those assessed in the NI PEIS.

DOE is issuing this amendment to the original ROD to announce the change of storage location for NpO₂ from REDC to ANL-W.
