

dispersions, inks, emulsions and extender slurries, adhesives, caulks, sealants, rubbers and plastics, textiles, leather, pulp and paper slurries, paper/paperboard, and wetlap. Diiodomethyl p-tolyl sulfone is also used for the preservation of wood.

EPA is providing an opportunity, through this notice, for interested parties to provide comments and input on the Agency's risk assessments for Diiodomethyl p-tolyl sulfone. Such comments and input could address, for example, the availability of additional data to further refine the risk assessments, such as soil contamination data; wood leaching data; confirmatory monitoring data; confirmatory inhalation toxicity data; or could address the Agency's risk assessment methodologies and assumptions as applied to this specific pesticide.

Through this notice, EPA also is providing an opportunity for interested parties to provide risk management proposals or otherwise comment on risk management for Diiodomethyl p-tolyl sulfone. Risks of concern associated with the use of Diiodomethyl p-tolyl sulfone are: Residential dermal risks of concern resulting from painting (brush/roller and airless sprayer), application of wood preservative (brush/roller and airless sprayer), and children playing with finger paint; residential inhalation risks of concern resulting from application of paint (airless sprayer); residential post-application dermal risks of concern for children resulting from treated carpets and wood products and oral risks of concern from treated carpets; occupational dermal risks of concern resulting from preservation of rubber and plastics (liquid pour and liquid pump) and preservation of leather (liquid pour); etc. In targeting these risks of concern, the Agency solicits information on effective and practical risk reduction measures.

EPA seeks to achieve environmental justice, the fair treatment and meaningful involvement of all people, regardless of race, color, national origin, or income, in the development, implementation, and enforcement of environmental laws, regulations, and policies. To help address potential environmental justice issues, the Agency seeks information on any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have atypical, unusually high exposure to Diiodomethyl p-tolyl sulfone, compared to the general population.

EPA is applying the principles of public participation to all pesticides undergoing reregistration and tolerance reassessment. The Agency's Pesticide

Tolerance Reassessment and Reregistration; Public Participation Process, published in the **Federal Register** on May 14, 2004 (69 FR 26819) (FRL-7357-9), explains that in conducting these programs, the Agency is tailoring its public participation process to be commensurate with the level of risk, extent of use, complexity of the issues, and degree of public concern associated with each pesticide. For Diiodomethyl p-tolyl sulfone, a modified, 4-Phase process with 1 comment period and ample opportunity for public consultation seems appropriate in view of its refined risk assessments. However, if as a result of comments received during this comment period EPA finds that additional issues warranting further discussion are raised, the Agency may lengthen the process and include a second comment period, as needed.

All comments should be submitted using the methods in **ADDRESSES**, and must be received by EPA on or before the closing date. Comments will become part of the Agency Docket for Amical 48. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments.

B. What is the Agency's Authority for Taking this Action?

Section 4(g)(2) of FIFRA, as amended, directs that, after submission of all data concerning a pesticide active ingredient, "the Administrator shall determine whether pesticides containing such active ingredient are eligible for reregistration," before calling in product-specific data on individual end-use products and either reregistering products or taking other "appropriate regulatory action."
