POLICY JUSTIFICATION

Egypt—TOW 2A Radio Frequency (RF) Missiles and Support

The Government of Egypt has requested to buy five thousand (5,000) TOW 2A, Radio Frequency (RF) missiles, BGM–71E–4B–RF; and seventy (70) TOW 2A, Radio Frequency (RF) missiles, BGM–71E–4B–RF (Fly-to-Buy Lot Acceptance missiles). Also included is missile support equipment; technical manuals/publications; spare parts; tool and test equipment; training; U.S. Government technical and logistical support, contractor technical support, and other associated equipment and services; and other related elements of logistical and program support. The estimated total cost is \$691 million.

This proposed sale will support the foreign policy and national security of the United States by helping to improve the security of a Major Non-North Atlantic Treaty Organization Ally that continues to be an important strategic partner in the Middle East.

The proposed sale will enhance Egypt's capability to strengthen its homeland defense by replenishing its stocks. The missiles will be used for

counter-terrorism and border security against armored threats and fortified positions. Egypt will have no difficulty absorbing these additional missiles into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Raytheon Missiles & Defense, Tucson, AZ. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Egypt.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The Radio Frequency TOW 2A (RF) Missile (BGM–71–4B–RF) is a direct attack missile designed to defeat armored vehicles, reinforced urban structures, field fortification and other such targets. TOW Missiles are fired from a variety of TOW Launchers in the U.S. Army, USMC, and FMS partner forces. The TOW 2A RF missile can be launched from the same launcher platforms as the existing wire-guided TOW 2A missile without modification to the launcher. The TOW 2A missile (both wire and RF) contains two tracker beacons (Xenon and thermal) for the launcher to track and guide the missile in flight. Guidance commands from the launcher are provided to the missile by the RF link contained within the missile case.

2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of

the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that Egypt can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Egypt.

Defense Health Network National Capital Region (DHN NCR) uses results from the SCORE™ to meet requirements for Leapfrog, a nonprofit advocate of transparency and quality in healthcare which evaluates military
