

with the Atlantic surfclam and ocean quahog fisheries. National Marine Fisheries Service (NMFS) Greater Atlantic Region manages these fisheries in the Exclusive Economic Zone (EEZ) of the Northeastern United States through the Atlantic Surfclam and Ocean Quahog Fishery Management Plan (FMP). The Mid-Atlantic Fishery Management Council prepared the FMP pursuant to the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). The regulations implementing the FMP are specified at 50 CFR part 648.

The recordkeeping and reporting requirements at §§ 648.74, 648.75, and 648.76 form the basis for this collection of information. We request information from surfclam and ocean quahog individual transferable quota (ITQ) permit holders to issue ITQ permits and to process and track requests from permit holders to transfer quota share or cage tags. We also request information from surfclam and ocean quahog ITQ permit holders to track and properly account for surfclam and ocean quahog harvest shucked at sea. Because there is not a standard conversion factor for estimating unshucked product from shucked product, NMFS requires vessels that shuck product at sea to carry on board the vessel a NMFS-approved observer to certify the amount of these clams harvested. This information, upon receipt, results in an efficient and accurate database for management and monitoring of fisheries of the Northeastern U.S. EEZ.

Georges Bank has been closed to the harvest of surfclams and ocean quahogs since 1990 due to red tide blooms that cause paralytic shellfish poisoning (PSP). We reopened a portion of the Georges Bank Closed Area starting in 2012 under certain conditions. We request information from surfclam and ocean quahog ITQ permit holders who fish in the reopened area to ensure compliance with the Protocol for Onboard Screening and Dockside Testing in Molluscan Shellfish. The U.S. Food and Drug Administration, the commercial fishing industry, and NMFS developed the PSP protocol to test and verify that clams harvested from Georges Bank continue to be safe for human consumption. The National Shellfish Sanitation Program adopted the PSP protocol at the October 2011 Interstate Shellfish Sanitation Conference.

The Council has approved Amendment 20 to the Surfclam and Ocean Quahog FMP, which would implement an excessive shares cap in this fishery. If that action is approved and implemented, some of the fields in

the ITQ ownership form and the ITQ transfer form may change as a result. Any revisions to this collection will be specified in the upcoming proposed rule for the amendment.

II. Method of Collection

Forms are online at <https://www.fisheries.noaa.gov/new-england-mid-atlantic/resources-fishing/greater-atlantic-region-forms-and-applications-summary> as “fillable” pdf documents, which can then be downloaded, printed, and faxed, mailed, or emailed to NMFS. ITQ transfer forms may also be submitted electronically. Information for the PSP protocol is submitted through paper forms, as well as through electronic methods, including email, telephone, and shipboard electronic equipment such as VHF radio, email, or a vessel monitoring system.
