

Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35) requires that Federal agencies provide interested parties an early opportunity to comment on information collection requests. The Director, Information Collection Clearance Division, Privacy, Information and Records Management Services, Office of Management, publishes this notice containing proposed information collection requests at the beginning of the Departmental review of the information collection. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Direct Loan Income Contingent Repayment Plan Alternative Documentation of Income.

OMB Control Number: 1845-0016.

Type of Review: Revision.

Total Estimated Number of Annual Responses: 294,924.

Total Estimated Number of Annual Burden Hours: 73,731.

Abstract: This form serves as the means by which a borrower who is repaying Direct Loan Program loans under the Income-Contingent Repayment (ICR) Plan or the Income-Based Repayment (IBR) Plan provides the U.S. Department of Education (the Department) with alternative documentation of the borrower's income. If the borrower's adjusted gross income (AGI) is not available from the IRS, or if the Department believes that the borrower's most recently reported AGI does not accurately reflect the borrower's current income. Under the Direct Loan Program regulations, a borrower's AGI is used to calculate the monthly loan repayment amount under the ICR and IBR plans.

Dated: May 17, 2012.

Darrin A. King,

Director, Information Collection Clearance Division, Privacy, Information and Records Management Services, Office of Management.

BILLING CODE 4000-01-P

DEPARTMENT OF EDUCATION

Annual Updates to the Income Contingent Repayment (ICR) Plan Formula for 2012; William D. Ford Federal Direct Loan Program

AGENCY: Federal Student Aid, Department of Education.

ACTION: Notice.

Catalog of Federal Domestic Assistance (CFDA) Number: 84.063.

SUMMARY: The Secretary announces the annual updates to the ICR plan formula for 2012. Under the William D. Ford Federal Direct Loan (Direct Loan) Program, borrowers may choose to repay their loans (Direct Subsidized Loans, Direct Unsubsidized Loans, Direct PLUS Loans made to graduate or professional students, and Direct Consolidation Loans) under the ICR plan, which bases the repayment amount on the borrower's income, family size, loan amount, and the interest rate applicable to each loan. Each year, we adjust the formula for calculating a borrower's ICR payment to reflect changes due to inflation. This notice contains the adjusted income percentage factors for 2012, examples of how the calculation of the monthly ICR amount is performed, a constant multiplier chart for use in performing the calculations, and charts showing sample repayment amounts based on the adjusted ICR plan formula. The adjustments to the income percentage factors for the ICR plan formula, contained in this notice, are effective for the period from July 1, 2012 to June 30, 2013.

FOR FURTHER INFORMATION CONTACT: Ian Foss, U.S. Department of Education, 830 First St. NE., Room 114I1, Washington, DC 20202. Telephone: (202) 377-3681 or by email: ian.foss@ed.gov.

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1-800-877-8339.

Individuals with disabilities can obtain this document in an accessible format (e.g., braille, large print, audiotape, or compact diskette) on request to the contact person listed under **FOR FURTHER INFORMATION CONTACT** in this section of the notice.

SUPPLEMENTARY INFORMATION: Direct Loan Program borrowers may choose to repay their Direct Subsidized Loans, Direct Unsubsidized Loans, Direct PLUS Loans made to graduate or professional students, and Direct Consolidation Loans under the ICR plan. This notice contains the following four attachments:

- *Attachment 1—Income Percentage Factors for 2012*
- *Attachment 2—Constant Multiplier Chart for Use in Calculating the Monthly ICR Amount*
- *Attachment 3—Examples of the Calculations of Monthly Repayment Amounts*
- *Attachment 4—Charts Showing Sample Repayment Amounts for Single and Married Borrowers*

In Attachment 1, we have updated the income percentage factors to reflect changes based on inflation. Specifically, we have revised the table of income percentage factors by changing the dollar amounts of the incomes shown by a percentage equal to the estimated percentage change in the Consumer Price Index for all urban consumers from December 2011 to December 2012. In Attachment 2, we provide a constant multiplier chart for a 12-year loan amortization. Further, in Attachment 3, we provide examples of monthly repayment amount calculations. Finally, in Attachment 4, we provide two charts that show sample repayment amounts for single and married or head-of-household borrowers at various income and debt levels based on the updated income percentage factors.

The updated income percentage factors reflected in Attachment 1 may cause a borrower's payments to be lower than they were in prior years (even if the borrower's income remains the same as the prior year). However, the revised repayment amount more accurately reflects the impact of inflation on a borrower's current ability to repay.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: www.gpo.gov/fdsys. 7.900	0.129237
8.000	0.129894
8.250	0.131545

Attachment 3—Examples of the Calculations of Monthly Repayment Amounts

General notes about the examples in this attachment:

- The interest rates used in the examples are for illustration only. Actual interest rates vary depending on loan type and when a loan was first disbursed.

- In the examples, the Poverty Guideline amounts used are from the 2012 U.S. Department of Health and Human Services (HHS) Poverty Guidelines for the 48 contiguous States and the District of Columbia, as published in the **Federal Register** on January 26, 2012 (77 FR 4034). Different

Poverty Guidelines apply to residents of Alaska and Hawaii.

- The “constant multiplier” included in each example is a factor used to calculate amortized payments at a given interest rate over a fixed period of time. Refer to the constant multiplier chart provided in Attachment 2 to this notice to determine the constant multiplier that should be used for a specific interest rate. If an interest rate is not listed in the constant multiplier chart in Attachment 2, use the next highest rate for estimation purposes.

- All examples use an income percentage factor corresponding to the borrower’s adjusted gross income (AGI). If the AGI is not listed in the income percentage factors table in Attachment 1, calculate the applicable income percentage factor for the AGI by following the instructions under the Interpolation heading later in this attachment.

- For married borrowers, the outstanding balance on the loans of each borrower and both borrowers’ AGIs are added together to determine the ICR payment amount. The amount of each payment applied to each borrower’s Direct Loan debt is the proportion of the payments that equals the same proportion as that borrower’s debt to the total outstanding balance. Each borrower is billed separately. For example, if a married couple has a total outstanding Direct Loan debt of \$60,000, \$40,000 of which belongs to one spouse, and \$20,000 of which belongs to the other spouse, 67 percent of the monthly

ICR payment would be apportioned to the spouse with the outstanding debt of \$40,000, with the remaining 33 percent of the monthly ICR payment being apportioned to the spouse with \$20,000 of debt. To take advantage of a joint ICR payment, married couples need not file taxes jointly; they may file separately and subsequently provide the other spouse’s tax information.

Example 1. This example assumes that the borrower is single with no dependents, and has \$15,000 in Direct Subsidized and Unsubsidized Loans. The interest rate on these loans is 6.80 percent, and the borrower has an AGI of \$40,048.

Step 1: Determine the total annual payment amount based on what the borrower would pay over 12 years using standard amortization. To do this, multiply the loan balance by the constant multiplier for the applicable interest rate. In this example, the interest rate is 6.80 percent, for which the constant multiplier is 0.122130.

- $0.122130 \times \$15,000 = \$1,831.95$
- Step 2:* Multiply the result of Step 1 by the income percentage factor shown in the income percentage factors table (see Attachment 1 to this notice) that corresponds to the AGI and then divide the result by 100:
- $88.77 \times \$1,831.95 \div 100 = \$1,626.22$

Step 3: Determine 20 percent of the borrower’s discretionary income (discretionary income is AGI minus the U.S. Department of Health and Human Services (HHS) Poverty Guideline amount for the borrower’s family size

and state of residence). To do this, subtract the Poverty Guideline amount for a family of one, for this example, from the borrower's AGI and multiply the result by 20 percent:

- $\$40,048 - \$11,170 = \$28,878$
- $\$28,878 \times 0.20 = \$5,775.60$

Step 4: Compare the amount from Step 2 with the amount from Step 3. The lower of the two will be the annual payment amount. In this example, the borrower will be paying the amount calculated under Step 2 (\$1,626.22). To determine the monthly repayment amount, divide the annual amount by 12.

- $\$1,626.22 \div 12 = \135.52

Example 2. In this example, the borrower is married and has no dependents, other than a spouse. The borrower has a Direct Loan balance of \$10,000, and the spouse has a Direct Loan balance of \$15,000. The interest rate on all of the loans is 6.80 percent.

The borrower and spouse have a combined AGI of \$75,682 and are repaying their loans jointly under the ICR plan (for general information regarding joint ICR payments for married couples, see the fifth bullet under the heading entitled "General notes about the examples" in this attachment).

Step 1: Add the borrower's and the borrower's spouse's Direct Loan balances together to determine their combined aggregate loan balance:

- $\$10,000 + \$15,000 = \$25,000$

Step 2: Determine the combined total annual payment amount for these borrowers based on what both borrowers would pay over 12 years using standard amortization. To do this, multiply the combined loan balance by the constant multiplier for the applicable interest rate. In this example, the interest rate is 6.80 percent, for which the constant multiplier is 0.122130.

- $0.122130 \times \$25,000 = \$3,053.25$

Step 3: Multiply the result of Step 2 by the income percentage factor shown in the income percentage factors table in Attachment 1 that corresponds to the borrower's and the borrower's spouse's combined AGI and then divide the result by 100:

- $109.40 \times \$3,053.25 \div 100 = \$3,340.26$

Step 4: Determine 20 percent of discretionary income. To do this, subtract the Poverty Guideline amount for a family of two, in this example, from the combined AGI and multiply the result by 20 percent:

- $\$75,682 - \$15,130 = \$60,552$
- $\$60,552 \times 0.20 = \$12,110.40$

Step 5: Compare the amount from Step 3 with the amount from Step 4. The lower of the two will be the annual payment amount for the borrower and

the borrower's spouse. The borrower and the borrower's spouse will jointly pay the amount calculated under Step 3 (\$3,340.26). To determine the monthly repayment amount, divide the annual amount by 12.

- $\$3,340.26 \div 12 = \278.36

Example 3. This example assumes that the borrower is single with no dependents and has \$15,000 in Direct Subsidized and Unsubsidized Loans. The interest rate on all of the loans is 6.80 percent, and the borrower's AGI is \$31,884.

Step 1: Determine the total annual payment amount based on what the borrower would pay over 12 years using standard amortization. To do this, multiply the loan balance by the constant multiplier for the applicable interest rate. In this example, the interest rate is 6.80 percent, for which the constant multiplier is 0.122130.

- $0.122130 \times \$15,000 = \$1,831.95$

Step 2: Multiply the result of Step 1 by the income percentage factor shown in the income percentage factors table in Attachment 1 that corresponds to the borrower's income and then divide the result by 100:

- $80.33 \times \$1,831.95 \div 100 = \$1,471.61$

Step 3: Determine 20 percent of discretionary income (discretionary income is the borrower's AGI minus the HHS Poverty Guideline amount for the borrower's family size). To do this, subtract the Poverty Guideline amount for a family of one, in this example, from AGI and multiply the result by 20 percent:

- $\$31,884 - \$11,170 = \$20,714$
- $\$20,714 \times 0.20 = \$4,142.80$

Step 4: Compare the amount from Step 2 with the amount from Step 3. The lower of the two will be the annual payment amount. In this example, the borrower will be paying the amount calculated under Step 2 (\$1,471.61). To determine the monthly repayment amount, divide the annual amount by 12.

- $\$1,471.61 \div 12 = \122.63

Example 4. In this example, the borrower is married and has no dependents, other than the spouse. The borrower and spouse have a combined AGI of \$40,048 and are repaying their loans under the ICR plan (for general information regarding joint ICR payments for married couples, see the fifth bullet under the heading entitled "General notes about the examples" in this attachment). The borrower has a Direct Loan balance of \$10,000, \$5,000 of which is at an interest rate of 6.80 percent and \$5,000 of which is at an interest rate of 7.0 percent. The spouse has a Direct Loan balance of \$15,000, \$5,000 of which is at an interest rate of 6.80 percent and \$10,000 of which is at an interest rate of 7.0 percent.

Step 1: Add the borrower's and the borrower's spouse's Direct Loan balances that have the same interest rate together to determine combined aggregate loan balances by interest rate:

- 6.8 percent: $\$5,000 + \$5,000 = \$10,000$
- 7.0 percent: $\$5,000 + \$10,000 = \$15,000$

Step 2: Determine the annual payment based on what would be paid over 12 years using standard amortization for each interest rate-based group of combined aggregate loan balances. To do this, multiply each group of combined aggregate loan balances by the constant multiplier for the applicable interest rate. For 6.80 percent, the constant multiplier is 0.122130. For 7.0 percent, the constant multiplier is 0.123406.

- $0.122130 \times \$10,000 = \$1,221.30$
- $0.123406 \times \$15,000 = \$1,851.09$

Step 3: Add the products of Step 2 together, multiply that total by the income percentage factor shown in the income percentage factors table in Attachment 1 that corresponds to the borrower's and the borrower's spouse's combined AGI, and then divide the result by 100:

- $\$1,221.30 + \$1,851.09 = \$3,072.39$
- $87.61 \times \$3,072.39 \div 100 = \$2,691.72$

Step 4: Determine 20 percent of discretionary income. To do this, subtract the Poverty Guideline amount for a family of two, in this example, from the combined AGI and multiply the result by 20 percent:

- $\$40,048 - \$15,130 = \$24,918$
- $\$24,918 \times 0.20 = \$4,983.60$

Step 5: Compare the amount from Step 3 with the amount from Step 4. The lower of the two will be the annual payment amount. In this example, the borrower and the borrower's spouse will jointly pay the amount calculated under Step 3 (\$2,691.72). To determine the monthly repayment amount, divide the annual amount by 12.

- $\$2,691.72 \div 12 = \224.31

Interpolation. If the borrower's income is not included on the income percentage factor table, calculate the income percentage factor through interpolation. For example, assume that the borrower is single with an income of \$30,000.

Step 1: Find the closest income listed that is less than \$30,000 and the closest income listed that is greater than \$30,000.

Step 2: Subtract the lower amount from the higher amount (for this discussion, we will call the result the "income interval"):

- $\$31,884 - \$26,797 = \$5,087$

Step 3: Determine the difference between the two income percentage factors that correspond to the incomes used in Step 2 (for this discussion, we will call the result the “income percentage factor interval”):

- 80.33 percent – 71.89 percent = 8.44 percent

Step 4: Subtract from the borrower’s income the closest income shown on the chart that is less than the borrower’s income of \$30,000:

- \$30,000 – \$26,797 = \$3,203

Step 5: Divide the result of Step 4 by the income interval determined in Step 2:

- \$3,203 ÷ \$5,087 = 0.6296

Step 6: Multiply the result of Step 5 by the income percentage factor interval:

- 8.44 percent × 0.6296 = 5.314 percent

Step 7: Add the result of Step 6 to the lower of the two income percentage

factors used in Step 3 to calculate the income percentage factor interval for \$30,000 in income:

- 5.314 percent + 71.89 percent = 77.20 percent (rounded to the nearest hundredth)

The result is the income percentage factor that will be used to calculate the monthly repayment amount under the ICR plan.
