The statutory authority for Part 1 of this information collection is contained in 47 U.S.C 151, 154(i), 154(j), 155, 225, 303(r), 309 and 325(e). The statutory authority for Part 63 of this information collection is contained in Sections 1, 4(i), 4(j), 10, 11, 201-205, 214, 218, 403 and 651 of the Communications Act of 1934, as amended, and 47 U.S.C. 151, 154(i), 154(j), 160, 201-205, 214, 218, 403 and 571. Total Annual Burden: 148,053 hours.

Annual Cost Burden: \$16,162,000.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: In general, there is no need for confidentiality.

Needs and Uses: This collection will be submitted to Office of Management and Budget (OMB) as a revision after this 60-day comment period has ended in order to obtain the full three-year OMB clearance. This collection will be revised to reflect more accurate and true burden estimates and to clarify and clearly state the rule sections that are included under OMB Control No. 3060-0686.

The collection of information is used by the Commission staff in carrying out its duties under the Communications Act. The information collections pertaining to Part 1 of the rules are necessary to determine whether the Commission should grant a license for proposed submarine cables landing in the United States. Pursuant to Executive Order No. 10530, the Commission has been delegated the President's authority under the Cable Landing License Act to grant cable landing licenses, provided that the Commission obtains the approval from the State Department and seeks advice from other government agencies as appropriate. The information collections pertaining to Part 63 are necessary largely to determine the qualifications of applicants to provide common carrier international telecommunications service, including applicants that are affiliated with foreign carriers, and to determine whether and under what conditions the authorizations are in the public interest, convenience, and necessity.

If the collections are not conducted or are conducted less frequently, applicants will not obtain the authorizations necessary to provide telecommunications services, and the Commission will be unable to carry out its mandate under the Communications Act of 1934 and the Cable Landing License Act. In addition, without the information collections, the United States would jeopardize its ability to fulfill the U.S. obligations as negotiated under the World Trade Organization (WTO) Basic Telecom Agreement because these collections are imperative to detecting and deterring anticompetitive conduct. They are also necessary to preserve the Executive Branch agencies' and the Commission's ability to review foreign investments for national security, law enforcement, foreign policy, and trade concerns.

OMB Control Number: 3060-0863.

Title: Satellite Delivery of Network Signals to Unserved Households for Purposes of the Satellite Home Viewer's Act (SHVA).

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents/Responses: 848 respondents; 250,000 responses.

Estimated Time per Response: 0.50 hours.

Frequency of Response: Recordkeeping requirement; On occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection is contained in the Satellite Home Viewer Act, 17 U.S.C. 119. The Satellite Home Viewer Act is an amendment of the Copyright Act.

Total Annual Burden: 125,000 hours.

Annual Cost Burden: None.

Privacy Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality.

Needs and Uses: 47 CFR 73.686 describes a method for measuring signal strength at a household so that the satellite and broadcast industries and consumers would have a uniform method for making an actual determination of the signal strength that a household received. The information gathered as part of the Grade B signal strength tests will be used to indicate whether consumers are "unserved" by over-the-air network signals. The written records of test results will be made after testing and predicting the strength of a television station's signal. Parties impacted by the test results will be consumers; parties using the written test results will primarily be the satellite and broadcasting industries.

OMB Control No.: 3060-0901.

Title: Reports of Common Carriers and Affiliates.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents: 20 respondents; 1,200 responses.

Estimated Time per Response: 5 hours.

Frequency of Response: On occasion reporting requirement; third-party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection is contained in Sections 1, 2, 4(i), 201, 203, 205, 214, 303(r) and 309 of the Communications Act of 1934, as amended; 47 U.S.C. Sections 151, 152, 154(i), 201, 205, 214, 303(r), and 309.

Total Annual Burden: 6,000 hours.

Annual Cost Burden: None.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: In general, there is no need for confidentiality.

Needs and Uses: This collection will be submitted to Office of Management and Budget (OMB) as an extension (no change in requirements) after this 60 day comment period has ended in order to obtain the full three year OMB clearance. The information is used by Commission staff to monitor the operating agreements of U.S. carriers and their foreign correspondents that possess market power, and, in particular, to monitor the international accounting rates of such carriers to ensure consistency with Commission policies and the public interest. The information also enables the Commission to preclude one-way bypass and safeguard its international settlements policy. The Commission's policies and objectives would be thwarted if the collections were conducted less frequently.

Federal Communications Commission.

Deputy Secretary.
