FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

The purpose of the research is to evaluate how environmental variability and individual heterogeneity affects the population dynamics of Weddell seals in the Antarctic. The applicant proposes to continue long-term studies of the Weddell seal population in the Erebus Bay, McMurdo Sound, Ross Sea and White Island areas of Antarctica. Up to 425 adults and 700 pups would be captured annually. Animals would be weighed, tissue sampled, flipper tagged, and released. A subset of 200 pups annually would have a small temperature logging tag attached. The applicant requests authorization to opportunistically collect, import, and export Weddell seal parts and carcasses. Annually up to 2,000 Weddell, 50 crabeater (*Lobodon carcinophagus*), and 50 leopard (*Hydrurga leptonyx*) seals may be incidentally disturbed as a result of the research activities. The applicant requests authorization for up to 4 (2 adults and 2 pups) Weddell seal research-related mortalities annually. The permit would be valid for five years from the date of issuance.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: May 23, 2012.

Tammy C. Adams,
Acting Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.
