

replacement and bluff improvement project at La Jolla, CA, will result, at most, in a temporary modification in behavior by Pacific harbor seals by head alerts and/or flushing from the beach. While behavioral modifications may be made by these species as a result of demolition and construction activities, this behavioral change is expected to result in no more than a negligible impact on the affected species. While the number of potential incidental harassment takes will depend on the distribution and abundance of marine mammals in the vicinity of the survey activity and the distance between the seals and the construction site, the number of potential harassment takings will be small, and no take by injury and/or death is anticipated. The project is not expected to interfere with any subsistence hunts. NMFS has therefore determined that the requirements of section 101(a)(5)(D) of the MMPA have been met and the authorization can be issued.

Authorization

NMFS has issued an IHA to the City of San Diego to take small numbers of Pacific harbor seals incidental to wall replacement and bluff improvement projects, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated.

Dated: November 15, 2004.

Director, Office of Protected Resources, National Marine Fisheries Service.
