

these noise exposure maps and accompanying documentation are in compliance with applicable requirements. This determination is effective on April 23, 2019.

FAA's determination on an airport operator's noise exposure maps is limited to a finding that the maps were developed in accordance with the procedures contained in Appendix A of Part 150. Such determination does not constitute approval of the applicant's data, information or plans, or a commitment to approve a noise compatibility program or to fund the implementation of that program. If questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on a noise exposure map submitted under section 47503 of the Act, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours, or in interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of section 47506 of the Act. These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under Part 150 or through FAA's review of noise exposure maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the map depicting properties on the surface rests exclusively with the airport operator that submitted those maps, or with those public agencies and planning agencies with which consultation is required under section 47503 of the Act. The FAA has relied on the certification by the airport operator, under section 150.21 of Part 150, that the statutorily required consultation has been accomplished.

Molly Lamrouex, Compliance Manager, Federal Aviation Administration, Alaskan Region Airports Division, 222 W 7th Avenue, Anchorage, AK 99513. Telephone Number: (907) 271-5439/ FAX Number: (907) 271-2851.

SUPPLEMENTARY INFORMATION: The FAA invites public comment on the request to release the aeronautical use only grant provision for improvements to an existing public boat ramp west of runway 13 operated by the Matanuska-Susitna Borough, under the provisions of 49 U.S.C. 47107(h)(2). The Alaska Department of Transportation and Public Facilities has requested from the FAA that a portion of airport property already in use as a public boat ramp be

retroactively released for non-aeronautical use. This release will also accommodate a proposed expansion of the boat ramp public parking area. The Matanuska-Susitna Borough operates the boat ramp as a public service and no payment to the airport is proposed. The FAA has determined that the release of the property will not likely adversely impact future aviation needs at the airport, though the expanded parking area will affect the sponsors ability to seek lower approach minimums. The FAA may approve the request, in whole or in part, no sooner than 30 days after the publication of this notice.

This release is considered to be for the benefit of the community and will not generate revenue.

Issued in Anchorage, Alaska, on May 9, 2019.

Kristi A. Warden,

Director, Alaskan Region Airports Division FAA.
