

maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Owners or operators of coal preparation plants which process more than 200 tons of coal per day.

Estimated Number of Respondents: 616.

Frequency of Response:

Semiannually.

Estimated Total Annual Hour Burden:

17,162 hours.

Estimated Total Capital and Operations & Maintenance (O & M)

Annual Costs: \$21,700 which includes \$0 annualized capital/startup costs and \$21,700 annual O&M costs.

Changes in the Estimates: There is increase of 1,699 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is due to more accurate accounting of existing sources subject to NSPS Subpart Y and an adjustment in the reporting frequency.

When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in EDOCKET. The entire printed comment, including the copyrighted material, will be available in the public docket. Although identified as an item in the official docket, information claimed as CBI, or whose disclosure is otherwise restricted by statute, is not included in the official public docket, *see* EPA's **Federal Register** notice describing the electronic docket at 67 FR 38102 (May 31, 2002), or go to <http://www.epa.gov/edocket>.

Title: NSPS for Industrial-Commercial-Institutional Steam Generating Units (40 CFR part 60, subpart Db), OMB Control Number 2060-0072, EPA ICR Number 1088.10. This is a request to renew an existing approved collection that is scheduled to expire on February 28, 2003. Under the OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: Owners or operators of steam generating units subject to Subpart Db must make one-time-only notifications of construction/reconstruction, anticipated and actual startup, initial performance test, physical or operational changes, and demonstration of a continuous monitoring system. They must also submit reports on initial performance test results, monitoring results, and excess emissions. Records must be maintained of startups, shutdowns, malfunctions, and periods when the continuous monitoring system is inoperative, and of various fuel combustion and pollutant emission parameters.

The required notifications are used to inform the Agency or delegated authority when a source becomes subject to the standard. Performance test reports are needed as these are the Agency's record of a source's initial capability to comply with the emission standard, and serve as a record of the operating conditions under which compliance was achieved. The monitoring and excess emissions reports are used for problem identification, as a

check on source operation and maintenance, and for compliance determinations. The information collected from recordkeeping and reporting requirements are used for targeting inspections, and for other uses in compliance and enforcement programs. The frequency of electronic reporting is quarterly. Otherwise, reporting frequency is semiannual.

Responses to this information collection are deemed to be mandatory, per section 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined not to be private. However, any information submitted to the Agency for which a claim of confidentiality is made will be safeguarded according to the Agency policies set forth in Title 40, Chapter 1, part 2, subpart B—Confidentiality of Business Information (*see* 40 CFR part 2; 41 FR 36902, September 1, 1976; amended by 43 FR 40000, September 8, 1978; 43 FR 42251, September 20, 1978; 44 FR 17674, March 23, 1979).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 200 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or operators of fossil-fuel-fired steam generating units subject to Subpart Db.

Estimated Number of Respondents: 1,230.

Frequency of Response: Semi-annually, Quarterly for electronic.

Estimated Total Annual Hour Burden: 591,389.

Estimated Total Annual Cost: \$59,384,435, includes \$9,000,000 annualized capital and \$17,775,000 O&M costs.

Changes in the Estimates: There is an increase of 16,356 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is due to an increase in the size of the regulated universe.

Dated: February 26, 2003.

Director, Collection Strategies Division.
