RIN 0648–BE31**Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Coastal Migratory Pelagic Resources in the Gulf of Mexico and Atlantic Region; Framework Amendment 1**

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues this final rule to implement management measures described in a framework amendment to the Fishery Management Plan for the Coastal Migratory Pelagic (CMP) Resources in the Gulf of Mexico and Atlantic Region (FMP) (Framework Amendment 1), as prepared and submitted by the South Atlantic and Gulf of Mexico Fishery Management Councils (Councils). This rule modifies the annual catch limits (ACLs) for Atlantic and Gulf of Mexico (Gulf) migratory groups of Spanish mackerel and modifies the recreational annual

catch target (ACT) for Atlantic migratory group Spanish mackerel, based on the results of the most recent stock assessments for these stocks. Framework Amendment 1 also specifies the optimum yield and acceptable biological catch (ABC) estimates for Atlantic and Gulf migratory groups of Spanish mackerel. The purpose of this rule is to update ACLs based on the best scientific information available and to ensure overfishing does not occur for the Spanish mackerel resources in the Atlantic and Gulf.

DATES: This rule is effective December 22, 2014.

ADDRESSES: Electronic copies of the Framework Amendment, which includes an environmental assessment, a regulatory flexibility act analysis and a regulatory impact review, may be obtained from the Southeast Regional Office Web site at <http://sero.nmfs.noaa.gov>.

Karla Gore, telephone: 727–824–5305, or email: karla.gore@noaa.gov.

SUPPLEMENTARY INFORMATION: The CMP fishery of the South Atlantic and the Gulf is managed under the FMP. The FMP was prepared by the Councils and implemented through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

On July 31, 2014, NMFS published a proposed rule for Framework Amendment 1 and requested public comment (79 FR 44369). The proposed rule and Framework Amendment 1 outline the rationale for the actions contained in this final rule. A summary of the actions implemented by this final rule is provided below.

Management Measures Contained in This Final Rule

This final rule revises the stock ACLs for Atlantic and Gulf migratory groups of Spanish mackerel, based on the results of the most recent assessments and the ABC recommendations by the Councils’ Scientific and Statistical Committees (SSCs). Additionally, this final rule revises the commercial and recreational ACLs (based on previously determined sector allocations), the recreational ACT, and the adjusted commercial quota for Atlantic migratory group Spanish mackerel, based on the revised commercial ACL (commercial quota).
