

monitoring plan. The required semiannual reports are used to determine periods of excess emissions, identify problems at the facility, verify operation/maintenance procedures, and for compliance determinations.

Form Numbers: None.

Respondents/affected entities: Secondary lead smelters.

Respondent's obligation to respond: Mandatory (40 CFR Part 63, Subpart X).

Estimated number of respondents: 14 (total).

Frequency of response: Initially, occasionally, semiannually and annually.

Total estimated burden: 13,038 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$1,651,633 (per year), includes \$375,200 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 7,499 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. In this ICR renewal, we have made adjustments to reflect current rule requirements and remove duplicate items contained in previous ICRs. In addition, this ICR renewal reflects a decrease in the number of respondents from 16 to 14 due to facility closures.

Environmental Protection Agency; Notice of Public Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA's Office of Pesticide Programs, the U.S. Fish and Wildlife Service (FWS), and the National Marine Fisheries Service (NMFS) (collectively, the Services), and the U.S. Department of Agriculture (USDA) are holding a 1-day workshop to provide an update on the status of interagency efforts to further develop interim scientific methods that were issued in November 2013 by EPA, the Services, and USDA in response to the National Academy of Sciences (NAS) report entitled, "Assessing Risks to Endangered and Threatened Species from Pesticides". This workshop builds upon public

meetings held in November and December 2013, and April and October 2014, and provides a forum for stakeholders to offer scientific and technical feedback on the ongoing efforts to develop draft Biological Evaluations (BEs) for three pilot chemicals (chlorpyrifos, diazinon, and malathion). This workshop provides an opportunity to continue the dialogue on the implementation of the enhanced stakeholder engagement process that was finalized in March 2013. The workshop is not designed, or intended, to be a decision-making forum; consensus will not be sought, or developed at the meeting. This meeting furthers the agencies' goal of developing a consultation process for assessing pesticide's impacts on listed species that is efficient, inclusive, and transparent.

DATES: The meeting will be held on April 15, 2015 from 8:30 a.m. to 5:30 p.m. The workshop will be available via webinar for those interested in attending the workshop remotely. A teleconference line will also be available. Requests to attend the workshop in person, or via webinar and teleconference must be received on or before April 7, 2015. Individuals wishing to make a presentation at the workshop should submit presentation materials by March 30, 2015.

To request accommodation of a disability, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**, preferably at least 10 days prior to the meeting, to give EPA as much time as possible to process your request.

II. Background

This workshop is an opportunity for stakeholders and agencies to continue their dialogue on the technical aspects of implementing the NAS recommendations in the context of ongoing interagency efforts to develop draft Biological Evaluations for the three pilot chemicals; this workshop builds upon public meetings held in November and December 2013, and April and October 2014, and implementation of the enhanced stakeholder engagement process that was finalized in March 2013. The workshop is not designed, or intended to be a decision-making forum; consensus will not be sought, or developed at the meeting.

Stakeholders are invited to hear presentations by the agencies on the

status and development of Problem Formulations for each of the three pilot chemicals: Chlorpyrifos, malathion, and diazinon. The agencies will cover the following topics in their presentations: Description of the federal action and opportunities for refinement, USDA's geospatial data for mapping agricultural uses of pesticides, other sources of geospatial data for mapping non-agricultural uses of pesticides, species range data, risk hypotheses and approaches to weight-of-the-evidence analysis, and application of the interim scientific methods using examples for aquatic and terrestrial listed species.

The agencies' interim approach document entitled, "Interagency Approach for Implementation of the National Academy of Sciences Report", dated November 13, 2013, and the presentation materials from the November 2013 stakeholder workshop are available at the following Web site: <http://www.epa.gov/oppfead1/endanger/2013/nas.html>.

Presentations by the agencies supporting this stakeholder workshop will be made available on the EPA Web site on April 1st (<http://www.epa.gov/espp>), and in the docket identified by EPA-HQ-OPP-2014-0233 prior to the workshop. Presentations supporting the previous stakeholder workshops held in April and October 2014 are also available in this docket.

Representatives from Federal agencies will join the dialogue to answer clarifying questions regarding the pesticide registration process and Endangered Species Act consultation process. The agencies see this workshop as an integral component of the stakeholder engagement process developed for pesticide consultations that contributes to the agencies' commitment to adapt and refine the interim approaches as we progress through initial consultations.

III. How can I request to participate in this meeting?

You may submit a request to participate in this meeting to the person listed under **FOR FURTHER INFORMATION CONTACT**. Do not submit any information in your request that is considered CBI. Requests to attend the meeting in person, or via webinar and teleconference, identified by docket ID number EPA-HQ-OPP-2014-0233, must be received on or before April 7, 2015.

Public parking is available for attendees; follow blue signs to the lot. There is a fee for all day parking.

Abstract: EPA has an ongoing program to evaluate the emission performance of in-use light-duty (passenger car and light truck) motor vehicles through surveillance and compliance testing, as well as special investigations in compliance with the Clean Air Act (42 U.S.C. 7541).

This ICR involves light-duty surveys and vehicle testing, which is strictly voluntary. A group of 25 to 50 potential participants is identified from state vehicle registration records. Three of the respondent pool are asked survey questions concerning vehicle condition, operation and maintenance. Additional groups of potential participants may be contacted until a sufficient number of vehicles have been obtained. Owners verify the survey information when they deliver their vehicles to EPA, release the vehicle to EPA, voluntarily provide maintenance records for copying, receive a cash incentive and, if requested, a loaner car, then receive the vehicle from EPA at the conclusion of the testing.

Form Numbers: 5900-304, 5900-305, 5900-306, 5900-307, 5900-308, 5900-309.

Respondents/affected entities: Vehicle owners.

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: 160 (total).
