

**OFFICE OF PERSONNEL
MANAGEMENT****Nonforeign Area Cost-of-Living
Allowances; Revised Living-Cost
Indexes**

AGENCY: Office of Personnel
Management.

ACTION: Notice.

SUMMARY: This notice publishes revised living-cost indexes relating to the “2002 Nonforeign Area Cost-of-Living Allowance Survey Report: Caribbean and Washington, DC, Areas;” the “2003 Nonforeign Area Cost-of-Living Allowance Survey Report: Alaska and Washington, DC, Areas;” and the “2004 Nonforeign Area Cost-of-Living Allowance Survey Report: Pacific and Washington, DC, Areas.” The Federal Government uses the results of these surveys to set cost-of-living allowance (COLA) rates for General Schedule, U.S. Postal Service, and certain other Federal employees in Alaska, Hawaii, Guam and the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands. The Office of Personnel Management revised the COLA area living-cost indexes based on additional rental data analyses undertaken after the publication of these reports in response to comments we received.

FOR FURTHER INFORMATION CONTACT:
Donald L. Paquin, (202) 606–2838; fax:
(202) 606–4264; or e-mail:
COLA@opm.gov.

SUPPLEMENTARY INFORMATION: Section 5941 of title 5, United States Code, authorizes Federal agencies to pay nonforeign area cost-of-living allowances (COLAs) to white-collar Federal and U.S. Postal Service employees stationed in Alaska, Hawaii, Guam and the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands. Executive Order 10000, as amended, delegates to the Office of Personnel Management (OPM) the authority to administer COLAs and prescribes certain operational features of the program. We conduct living-cost surveys in each allowance area and in the Washington, DC, area to determine whether, and to what degree, COLA area living costs are higher than those in the DC area. We set the COLA rate for each area based on the results of these surveys.

Section 591.229 of title 5, Code of Federal Regulations, requires OPM to publish COLA survey summary reports in the **Federal Register**. On February 9, 2004, OPM published the “2002 Nonforeign Area Cost-of-Living Allowance Survey Report: Caribbean

and Washington, DC, Areas” at 69 FR 6020. On March 12, 2004, OPM published the “2003 Nonforeign Area Cost-of-Living Allowance Survey Report: Alaska and Washington, DC, Areas” at 69 FR 12002. On August 4, 2005, OPM published the “2004 Nonforeign Area Cost-of-Living Allowance Survey Report: Pacific and Washington, DC, Areas” at 70 FR 44989. OPM also published on August 4, 2005, a notice on revised shelter (rent) analyses at 70 FR 44978 and a proposed rule on COLA rate changes at 70 FR 44976.

As described in the reports, OPM conducts living-cost surveys in each of the COLA areas and in the Washington, DC, area and compares living-costs between the COLA areas and the DC area to set COLA rates. As also described in the reports, we survey rents in both the COLA areas and DC areas to compute the relative cost of shelter. OPM typically collects over 1,000 rental observations in each survey and also obtains information on over 80 characteristics of each of the rental observations.

Because housing can differ significantly within and between areas, OPM uses hedonic regressions (a type of multiple regression) to compare rents while holding quality and quantity constant. The rent comparisons are in the form of rent indexes, and the survey reports described the hedonic regression equations we use to compute rent indexes. The reports did not describe, however, how OPM selects the variables it uses in the hedonic regressions, and it is this process that OPM changed in response to comments it received.

To develop the process and its recent refinement, OPM consulted with the Survey Implementation Committee (SIC) and the Technical Advisory Committee (TAC). The SIC was established under the stipulation of settlement in *Caraballo et al. v. United States*, No. 1997–0027 (D.V.I), August 17, 2000, and is composed of representatives of the parties in *Caraballo*. The SIC in turn consults with the TAC, which was also established under the *Caraballo* settlement and is composed of three economists with expertise in living-cost comparisons. One of the issues OPM consulted with the SIC and TAC about is how to select defensible and objective variables for the rental hedonic regressions.

For the proposed rule, OPM used a multi-step process developed in consultation with the SIC and the TAC. The first step in the process was to identify “core” variables (e.g., number of bedrooms, number of bathrooms, and square footage). Core variables we use

are consistently highly significant in our joint research, and we use them in all of our hedonic rental regression models.

The remaining variables are the “non-core” variables. In the process we used, statistically insignificant non-core variables were dropped from the hedonic regressions. OPM dropped non-core variables that were not statistically significant from the hedonic regressions. We did this in a series of steps, sequentially increasing the threshold for the significance tests because dropping variables could affect the significance of other variables. In the end, OPM had a hedonic regression model with a limited number of variables, each of which were highly significant (i.e., had a Type III probability of F less than or equal to 0.001).

In response to comments received on the proposed rule (and as described in the final rule accompanying this notice), OPM performed additional hedonic regressions (e.g., added listing source). Using the process described in the paragraph above. After comparing the results of the new regressions with those we proposed, the TAC recommended adding additional steps in the selection of variables for the hedonic regressions. These additional steps involved examining the effect of non-core variables on the standard errors of the survey area parameters.

As explained in the survey reports, the survey area parameter estimates, when converted from logarithms and after a slight correction for the use of logarithms, become the rent indexes. The standard errors of the survey area parameter estimates are a measure of the precision of the estimates, i.e., a measure of the precision of the rent index. The additional steps recommended by the TAC involved examining the effect of non-core variables on standard errors and deleting non-core variables that increased the standard errors. In other words, in these last steps, OPM removed variables whose inclusion would otherwise make the rent index less precise.

The additional steps resulted in fewer variables compared to the regressions OPM published in the previous notices. We also corrected errors in the 2002, 2003, and 2004 data bases. We uncovered some of the errors as a result of new automated quality assurance software we developed after we published these surveys. We uncovered other errors as we researched the comments on the proposed rule. We made the corrections to the data bases and used the new hedonic regression procedures recommended by the TAC. The new regressions for 2002, 2003, and

2004 are in Appendices 1, 2, and 3 respectively of this notice. Both the

previously published and new rent indexes are shown in Table 1 below.

TABLE 1.—PREVIOUSLY PUBLISHED AND FINAL RENT INDEXES

Year	Area	Previous rent index	New rent index
2002	Puerto Rico	70.89	63.49
2002	St. Croix, USVI	71.71	69.51
2002	St. Thomas/St. John, USVI	88.63	88.37
2003	Anchorage, Alaska	89.99	89.46
2003	Fairbanks, Alaska	79.96	79.98
2003	Juneau, Alaska	91.68	91.90
2004	Honolulu, HI	132.21	125.85
2004	Hilo, HI	81.19	74.97
2004	Kailua Kona/Waimea Area, HI	106.75	101.35
2004	Kauai, HI	117.61	108.15
2004	Maui, HI	127.62	118.00
2004	Guam	89.52	88.72
2004	Washington, DC, Area	*100.00	*100.00

* By definition, the index of the base area is always 100.00. OPM surveys the Washington, DC, area every year.

Using the new rent indexes, OPM computed new final overall COLA indexes. Table 2 shows the new final indexes. Appendix 4 to this notice

shows the derivation of the new Caribbean final indexes. Appendix 5 shows the derivation of the new Alaska final indexes. Appendix 6 shows the

derivation of the new Pacific final indexes.

TABLE 2.—PREVIOUS PUBLISHED AND FINAL LIVING-COST INDEXES

Allowance area/category	Previously published living-cost indexes	Revised living-cost indexes
Puerto Rico	105.10	103.04
U.S. Virgin Islands	122.84	122.53
Anchorage, Alaska	113.79	113.64
Fairbanks, Alaska	115.61	115.62
Juneau, Alaska	118.03	118.09
Rest of the State of Alaska	136.00	135.84
Honolulu County, Hawaii	127.78	125.80
Hawaii County, Hawaii	119.11	117.25
Kauai County, Hawaii	130.58	127.63
Maui County, Hawaii	134.49	131.50
Guam and the Northern Mariana Islands	127.65	127.40

These are the indexes that are used in the final rule to produce the final COLA rates for each of the COLA areas.

Office of Personnel Management.
