

State Park, while also excluding from the otherwise protected area Old Miller Place Subdivision, as well as portions of Gulf Trace Subdivision and the Town of Grayton Beach. Under the new map, 22 acres (13 fastland acres and 9 associated aquatic habitat acres) were removed from Unit FL-95P, and 1,582 acres (901 fastland acres and 681 associated aquatic habitat acres) of State park land were added to Unit FL-95P. The changes to the map also ensure that the boundary of Unit FL-96 more precisely follows geomorphic features. Four acres (3 fastland acres and 1 associated aquatic habitat acre) were removed from Unit FL-96, and 2 acres of associated aquatic habitat were added to Unit FL-96.

Revisions to the John H. Chafee Coastal Barrier Resources System in Georgia

Public Law 109-354, enacted on October 16, 2006, replaced the map relating to Jekyll Island Unit GA-06P in Glynn County, Georgia, with a revised map entitled "John H. Chafee Coastal Barrier Resources System, Jekyll Island Unit GA-06P." The changes to the map remove all developed land and approximately 100 acres of undeveloped land from Unit GA-06P. Under the new map, 1,605 acres (1,355 fastland acres and 250 associated aquatic habitat acres) were removed from Unit GA-06P, and 1,478 acres (72 fastland acres and 1,406 associated aquatic habitat acres) were added to Unit GA-06P.

How To Get Copies of the Maps

The Service has given copies of the revised John H. Chafee Coastal Barrier Resources System maps to the House of Representatives Committee on Natural Resources, the Senate Committee on Environment and Public Works, the members of Congress for each affected area, and each appropriate Federal, State, and local agency with jurisdiction over the areas in which the modified units are located.

John H. Chafee Coastal Barrier Resources System maps, including the replacement maps referenced in this **Federal Register**, are available for download from the Coastal Barrier Resources System web page: http://www.fws.gov/habitatconservation/coastal_barrier.htm.

The public may also contact the following Service offices to make arrangements to view the maps:

Washington Office—All Coastal Barrier Resources System maps

U.S. Fish and Wildlife Service, Division of Habitat and Resource Conservation, 4401 N. Fairfax Dr., Room

400, Arlington, VA 22203; (703) 358-2161.

Southeast Regional Office—All Coastal Barrier Resources System maps for AL, FL, GA, LA, MS, NC, SC, PR, and VI

Region 4, U.S. Fish and Wildlife Service, 1875 Century Blvd., Suite 400, Atlanta, GA 30345; (404) 679-4000.

Southwest Regional Office—All Coastal Barrier Resources System maps for TX

Region 2, U.S. Fish and Wildlife Service, 500 Gold Ave. SW., Albuquerque, NM 87102; (505) 248-6911.

Field Offices—Coastal Barrier Resources System maps for NC, GA, FL, and TX

Field Supervisor, U.S. Fish and Wildlife Service, P.O. Box 33726, Raleigh, NC 27636-3726; (919) 856-4520.

BILLING CODE 4310-55-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Recovery Plan for the Pacific Coast Population of the Western Snowy Plover

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce the availability of the recovery plan for the Pacific Coast population of the Western Snowy Plover (*Charadrius alexandrinus nivosus*). The final plan includes recovery criteria and measures for the Pacific coast population of the western snowy plover.

ADDRESSES: You may obtain a copy of the plan by either of the following methods: *Internet:* Download a copy at <http://endangered.fws.gov/recovery/index.html#plans>; or *U.S. mail:* Send a

request to U.S. Fish and Wildlife Service, Sacramento Fish and Wildlife Office, 2800 Cottage Way, Room W-2605, Sacramento, CA 95825. Printed copies of the recovery plan will be available for distribution in 4 to 6 weeks.

FOR FURTHER INFORMATION CONTACT:

Craig Aubrey, Fish and Wildlife Biologist, at the above Sacramento address (telephone, 916-414-6600).

SUPPLEMENTARY INFORMATION:

Background

Restoring endangered or threatened animals and plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of our endangered species program. To help guide the recovery effort, we are working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for the conservation of the species, establish criteria for the recovery levels for downlisting or delisting them, and estimate time and cost for implementing the recovery measures needed.

Section 4(f) of the Endangered Species Act (Act) (16 U.S.C. 1531 *et seq.*) requires us to provide public notice and an opportunity for public review and comment during recovery plan development. We made the draft recovery plan for the Pacific Coast population of western snowy plover was available for public comment from August 14, 2001, through December 12, 2001 (66 FR 42676). We provided an opportunity to resubmit comments due to the possibility that some comments submitted were not received due to a shutdown in the Department of the Interior's internet access, including receipt of outside electronic mail. Resubmitted comments were accepted through February 15, 2002. We considered information we received during the public comment period in our preparation of this final recovery plan, and also summarized that information in an appendix of the recovery plan. We will forward substantive comments regarding recovery plan implementation to appropriate Federal or other entities so they can take these comments into account in the course of implementing recovery actions.

The Pacific coast breeding population of the western snowy plover (*Charadrius alexandrinus nivosus*) currently extends from Damon Point, Washington, to Bahia Magdalena, Baja California, Mexico. Snowy plovers (Pacific coast population) breed

primarily above the high tide line on coastal beaches, sand spits, dune-backed beaches, sparsely vegetated dunes, beaches at creek and river mouths, and salt pans at lagoons and estuaries. Less common nesting habitats include bluff-backed beaches, dredged material disposal sites, salt pond levees, dry salt ponds, and river bars. The snowy plover winters mainly in coastal areas from southern Washington to Central America. In winter, snowy plovers are found on many of the beaches used for nesting as well as on beaches where they do not nest, in manmade salt ponds, and on estuarine sand and mud flats. Habitat degradation caused by human disturbance, urban development, introduced beachgrass (*Ammophila* spp.), and expanding predator populations has resulted in a decline in active nesting areas and in the size of the breeding and wintering populations.

Our primary objective in this recovery plan is to remove the Pacific coast population of the western snowy plover from the List of Endangered and Threatened Wildlife and Plants by achieving well-distributed increases in numbers and productivity of breeding adult birds, and providing for long-term protection of breeding and wintering plovers and their habitat. Specific actions needed to achieve this objective and described in the recovery plan include (1) protection of breeding and wintering habitat; (2) monitoring and managing breeding habitat; (3) monitoring and managing wintering and migration areas; (4) undertaking scientific research that facilitates recovery efforts; (5) public participation, outreach, and education; and (6) establishing an international conservation program with the Mexican government to protect snowy plovers and their breeding and wintering locations in Mexico.

Authority

The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: September 17, 2007.

Darrin Thome,

*Acting Manager, California/Nevada
Operations Office, U.S. Fish and Wildlife
Service.*

BILLING CODE 4310-55-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Supawna Meadows National Wildlife Refuge, Salem County, NJ

AGENCY: Fish and Wildlife Service,
Interior.

ACTION: Notice of intent to prepare a
comprehensive conservation plan and
environmental assessment;
announcement of public scoping and
request for comments.

SUMMARY: The U.S. Fish and Wildlife
Service (we, us, Service) is gathering the
information needed to prepare a
comprehensive conservation plan (CCP)
and associated environmental
assessment (EA) for Supawna Meadows
National Wildlife Refuge (NWR). We
publish this notice in compliance with
our policy of advising other agencies
and the public of our intentions to
conduct detailed planning on refuges
and obtain suggestions and information
about the scope of issues to consider in
the planning process.

DATES: We held public scoping meetings
in September 2007 after announcing the
location, date, and times at least 2
weeks in advance in special mailings,
notices in local newspapers, in radio
public service announcements, on our
Web site ([http://www.fws.gov/northeast/
planning](http://www.fws.gov/northeast/planning)), and through personal
contacts. To ensure our consideration of
your written comments, you must
submit them within 30 days of the
publication of this notice.

ADDRESSES: Send your comments or
requests for more information on the
planning process to Beth Goldstein,
Refuge Planner, U.S. Fish and Wildlife
Service, 300 Westgate Center Drive,
Hadley, MA, 01035; 413-253-8564
(telephone); 413-253-8468 (fax);
northeastplanning@fws.gov (electronic
mail). If submitting comments by
electronic mail, please put "Supawna
Meadows NWR" in the subject line.

FOR FURTHER INFORMATION: To obtain
more information on the refuge, contact
Howard Schlegel, Refuge Manager, Cape
May NWR, at 609-463-0994
(telephone); fw5rw_spmnwr@fws.gov
(electronic mail); [http://www.fws.gov/
refuges/profiles/index.cfm?id=52571](http://www.fws.gov/
refuges/profiles/index.cfm?id=52571)
(Supawna Meadows NWR Web site).

SUPPLEMENTARY INFORMATION: This
notice initiates the comprehensive
conservation planning process for
Supawna Meadows NWR, which is
administered by Cape May NWR staff
with headquarters in Cape May Court
House, New Jersey.

Background

The CCP Process

The National Wildlife Refuge System
Administration Act of 1966, as amended
by the National Wildlife Refuge System
Improvement Act of 1997 (16 U.S.C.
668dd-668ee), requires us to develop a
CCP for each national wildlife refuge.
The purpose of a CCP is to provide
refuge managers with a 15-year plan for
achieving refuge purposes and
contributing to the mission of the
National Wildlife Refuge System
(NWRS), consistent with the sound
principles of fish and wildlife
management and conservation, legal
mandates, and Service policies. In
addition to providing broad
management direction on conserving
wildlife and habitat, the plans identify
wildlife-dependent recreational
opportunities available to the public,
including opportunities for hunting,
fishing, wildlife observation and
photography, and environmental
education and interpretation. We will
review and update the CCP at least
every 15 years.

We establish each refuge for specific
purposes, and use those purposes to
develop and prioritize its management
goals, objectives, and public uses. The
planning process is one way for us and
for the public to evaluate those goals
and objectives for the best possible
conservation of important wildlife
habitat, while providing opportunities
for wildlife-dependent recreation
compatible with those purposes and the
mission of the NWRS.

We request your input on all issues,
concerns, ideas, improvements and
suggestions for the future management
of Supawna Meadows NWR. You may
submit comments at any time during the
planning process by writing to the
refuge planner (see **ADDRESSES** above).

We will conduct the environmental
review of this project in accordance
with the requirements of the National
Environmental Policy Act of 1969
(NEPA), as amended (42 U.S.C. 4321, *et
seq.*), the Council on Environmental
Quality Regulations on NEPA (40 CFR
parts 1500-1508), other appropriate
Federal laws and regulations, and our
policies and procedures for complying
with them. All of the comments we
receive on either our EAs or our
environmental impact statements
become part of the official public
record. We will handle requests for
those comments in accordance with the
Freedom of Information Act, NEPA (40
CFR 1506.6(f)), and other policies and
procedures of the Department of the
Interior or the Service. When we receive
such a request, we will provide
