Security Investments for Energy Infrastructure Technical Conference; Notice Inviting Post-Technical Conference Comments

On Thursday, March 28, 2019, the Federal Energy Regulatory Commission and the United States Department of Energy convened a Commissioner- and DOE senior official-led technical conference to discuss current cyber and physical security practices used to protect energy infrastructure and to explore how Federal and State authorities can provide incentives and cost recovery for security investments in energy infrastructure, particularly for the electric and natural gas sectors.

Specifically, the technical conference was aimed at better understanding (1) the types of cyber and physical security threats to energy infrastructure, particularly electric transmission, generation, and natural gas pipelines; (2) the need for security investments that go beyond those measures already required by mandatory reliability standards, including in infrastructure not subject to those standards (e.g., natural gas pipelines); (3) how the costs
