NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Submission for the Office of Management and Budget (OMB) Review; Comment Request

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a current valid OMB control number.

1. *Type of submission, new, revision, or extension:* Extension.

2. *The title of the information collection:* 10 CFR part 74, "Material Control and Accounting of Special Nuclear Material (SNM);" NUREG-1065, Rev. 2, "Acceptable Standard Format and Content for the Fundamental Nuclear Material Control (FNMC) Plan Required for Low Enriched Uranium Facilities;" NUREG/CR-5734, "Recommendations to the NRC on Acceptable Standard Format and Content for the Fundamental Nuclear Material Control Plan Required for Low-Enriched Uranium Enrichment Facilities;" and NUREG-1280, Rev. 1, "Standard Format and Content Acceptance Criteria for the Material Control and Accounting (MC&A) Reform Amendment."

3. *The form number if applicable:* Not applicable.

4. *How often the collection is required:* Submission of the FNMC is a one-time requirement which has been completed by all current licensees. However, licensees may submit amendments or revisions to the plans as necessary. In addition, specified inventory and material status reports are

required annually or semiannually. Other reports are submitted as events occur.

5. *Who will be required or asked to report:* Persons licensed under 10 CFR parts 70 who possess and use certain forms and quantities of SNM.

6. *An estimate of the number of responses:* 36 (25 responses + 11 recordkeepers).

7. *The estimated number of annual respondents:* 23.

8. *An estimate of the number of hours needed annually to complete the requirement or request:* The number of hours needed annually to complete the requirement or request: 6,314 (1,369 hours for reporting and 4,945 hours for recordkeeping [an average of 55 hours per response and 450 hours annually for each of 11 recordkeepers]).

9. *An indication of whether section 3507(d), Public Law 104-13 applies:* Not applicable.

10. *Abstract:* 10 CFR part 74 establishes requirements for material control and accounting of SNM, and specific performance-based regulations for licensees authorized to possess and use strategic special nuclear material, or to possess and use, or produce, special nuclear material of low strategic significance. The information is used by the NRC to make licensing and regulatory determinations concerning material control and accounting of special nuclear material and to satisfy obligations of the United States to the International Atomic Energy Agency (IAEA). Submission or retention of the information is mandatory for persons subject to the requirements.

A copy of the final supporting statement may be viewed free of charge at the NRC Public Document Room, One White Flint North, 11555 Rockville Pike, Room O-1 F21, Rockville, MD 20852. OMB clearance requests are available at the NRC worldwide Web site: <http://www.nrc.gov/public-involve/doc-comment/omb/index.html>. The document will be available on the NRC home page site for 60 days after the signature date of this notice.

Comments and questions should be directed to the OMB reviewer listed below by August 23, 2002. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given to comments received after this date.

Bryon Allen, Office of Information and Regulatory Affairs (3150-0123), NEOB-10202, Office of Management and Budget, Washington, DC 20503.

Comments can also be submitted by telephone at (202) 395-3087.

The NRC Clearance Officer is Brenda Jo. Shelton, 301-415-7233.

Dated at Rockville, Maryland, this 17th day of July 2002.

For the Nuclear Regulatory Commission.

Brenda Jo. Shelton,

NRC Clearance Officer, Office of the Chief Information Officer.

NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget (OMB) Review

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

1. *Type of submission, new, revision, or extension:* Revision.

2. *The title of the information collection:* Proposed rule, "Geological and Seismological Characteristics for the Siting and Design of Dry Cask Independent Spent Fuel Storage Installations and Monitored Retrievable Storage Installations" which would amend 10 CFR part 72, "Licensing Requirements for the Independent Storage of Spent Nuclear Fuel, High-Level Radioactive Waste, and Reactor-Related Greater Than Class C Waste."

3. *The form number if applicable:* Not applicable.

4. *How often the collection is required:* Specific license applications are only required to be submitted for the initial license, for the Certificate of Compliance, for amendments, and for renewal every 20 years (40 years for a monitored retrievable storage installation). General licenses for a dry cask independent spent fuel storage installation are issued under § 72.210 to persons authorized to possess a NPP license under part 50, without filing a part 72 license application. General licensees are required under § 72.212(b)(2) to retain as a record on site, a copy of the written evaluation until spent fuel is no longer stored under the general license issued under § 72.210.

5. *Who will be required or asked to report:* New specific licensees and

applicants under 72.7 and 72.16 (reporting). General licensees under 72.212(b)(2) (recordkeeping).

6. *An estimate of the number of responses:* (8.5).

7. *The estimated number of annual respondents:* (8.5) (—1.5 reporting under sections 72.7 and 72.16 and —7 recordkeepers under 72.212(b)(2)).

8. *An estimate of the total number of hours needed annually to complete the requirement or request:* (466) (-7,406 hours for reporting and 6,940 hours for recordkeeping).

9. *An indication of whether section 3507(d), Public Law 104-13 applies:* Not applicable.

10. *Abstract:* 10 CFR part 72 establishes requirements, procedures, and criteria for the issuance of licenses to receive, transfer, and possess power reactor spent fuel and other radioactive materials associated with spent fuel storage in a dry cask independent spent fuel storage installation, and requirements for the issuance of licenses to the Department of Energy to receive, transfer, package, and possess power reactor spent fuel and high-level radioactive waste, and other associated radioactive materials, in a monitored retrievable storage installation. The proposed amendments would make the part 72 regulations compatible with the 1996 revision to 10 CFR part 100 that addressed uncertainties in seismic hazard analysis, and commensurate with the risk associated with a dry cask independent spent fuel storage installation or a monitored retrievable storage installation. The proposed amendments would also specify that general licensees evaluate dynamic loads, as well as static loads, in the design of cask storage pads and areas. These proposed amendments would make the part 72 requirements more effective and efficient and reduce the burden on licensees and on the NRC, without an adverse effect on public health and safety, or on the environment.

Submit, by August 23, 2002, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the burden estimate accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?
