SUPPLEMENTARY INFORMATION: On February 18, 2010, the FAA published a notice in the Federal Register (75 FR 7306) seeking comment on a joint waiver request filed by Delta Air Lines and US Airways seeking a waiver from the prohibition on purchasing operating authorizations ("slots" or "slot interest") at LaGuardia Airport. The comment period closed on March 22, 2010. The FAA finds it in the public interest to reopen the comment period for seven days to give all interested parties additional time to file rebuttal comments. Any rebuttal comments filed by April 5, 2010, will be considered.

Issued in Washington, DC, on March 29, 2010.

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[STB Ex Parte No. 290 (Sub-No. 4)]

Railroad Cost Recovery Procedures— Productivity Adjustment

AGENCY: Surface Transportation Board.

ACTION: Adoption of a railroad cost recovery procedures productivity adjustment.

SUMMARY: By decision served on February 1, 2010, the Board proposed to adopt 1.010 (1.0% per year) as the 2008 productivity adjustment, as measured by the average change in railroad productivity for the years 2004 through 2008. The February 1, 2010 decision provided an opportunity to file comments regarding any perceived data and computational errors in the Board's

calculation. The Board's decision also stated that the proposed productivity adjustment would become effective on March 1, 2010, unless the Board issued a further order postponing the effective date.

On February 22, 2010, the Board received timely comments from the Western Coal Traffic League (WCTL) regarding the output index calculation for 2008. To allow for adequate consideration of WCTL's comments, the Board issued a decision on February 26, 2010, postponing the effective date of the 2008 productivity adjustment pending further order of the Board.

In its comments, WCTL questioned the 2008 output index as compared to the 2007 output index. In response to WCTL's comments, we reviewed the calculations for the output indices for both of those years. This review revealed the inadvertent use of masked revenues from the waybill records in both the 2007 and 2008 calculations, and the exclusion of certain waybill records in the 2007 calculations. Once these errors were discovered and corrected, we verified that the output index calculations for the entire 2004-2008 averaging period used unmasked revenues and did not improperly exclude waybill records.

Accordingly, for the corrected 2008 productivity adjustment, the Board's calculation of the output index for 2007 of 1.014 should be modified to 1.000, and the Board's calculation of the output index for 2008 of 0.967 should be modified to 0.990. As a result, the corrected 5-year geometric mean of the annual change in productivity for the 2004-2008 period is 1.012 (or 1.2% per year).

DATES: The productivity adjustment is effective on March 26, 2010.

BILLING CODE 4810-25-P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Credit for Renewable Electricity Production, Refined Coal Production, and Indian Coal Production, and Publication of Inflation Adjustment Factors and Reference Prices for Calendar Year 2010

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Publication of inflation adjustment factors and reference prices for calendar year 2010 as required by section 45(e)(2)(A) of the Internal Revenue Code (26 U.S.C. 45(e)(2)(A)), section 45(e)(8)(C) (26 U.S.C.

45(e)(8)(C)), and section 45(e)(10)(C) (26 U.S.C. 45(e)(10)(C)).

SUMMARY: The 2010 inflation adjustment factors and reference prices are used in determining the availability of the credit for renewable electricity production, refined coal production, and Indian coal production under section 45.

DATES: The 2010 inflation adjustment factors and reference prices apply to calendar year 2010 sales of kilowatt hours of electricity produced in the United States or a possession thereof from qualified energy resources, and to 2010 sales of refined coal and Indian coal produced in the United States or a possession thereof.

Inflation Adjustment Factors: The inflation adjustment factor for calendar year 2010 for qualified energy resources and refined coal is 1.4342. The inflation adjustment factor for Indian coal is 1.0976.

Reference Prices: The reference price for calendar year 2010 for facilities producing electricity from wind is 4.22 cents per kilowatt hour. The reference prices for fuel used as feedstock within the meaning of section 45(c)(7)(A) (relating to refined coal production) are \$31.90 per ton for calendar year 2002 and \$54.74 per ton for calendar year 2010. The reference prices for facilities producing electricity from closed-loop biomass, open-loop biomass, geothermal energy, solar energy, small irrigation power, municipal solid waste, qualified hydropower production, marine and hydrokinetic renewable energy have not been determined for calendar year 2010.

Because the 2010 reference price for electricity produced from wind does not exceed 8 cents multiplied by the inflation adjustment factor, the phaseout of the credit provided in section 45(b)(1) does not apply to such electricity sold during calendar year 2010. Because the 2010 reference price of fuel used as feedstock for refined coal does not exceed the \$31.90 reference price of such fuel in 2002 multiplied by the inflation adjustment factor and 1.7, the phaseout of credit provided in section 45(e)(8)(B) does not apply to refined coal sold during calendar year 2010. Further, for electricity produced from closed-loop biomass, open-loop biomass, geothermal energy, solar energy, small irrigation power, municipal solid waste, qualified hydropower production, marine and hydrokinetic renewable energy, the phaseout of credit provided in section 45(b)(1) does not apply to such electricity sold during calendar year 2010.

Credit Amount by Qualified Energy Resource and Facility, Refined Coal,

and Indian Coal: As required by section 45(b)(2), the 1.5-cent amount in section 45(a)(1), the 8-cent amount in section 45(b)(1), and the \$4.375 amount in section 45(e)(8)(A) and the \$2.00 amount in section 45(e)(8)(D), are each adjusted by multiplying such amount by the inflation adjustment factor for the calendar year in which the sale occurs. If any amount as increased under the preceding sentence is not a multiple of 0.1 cent, such amount is rounded to the nearest multiple of 0.1 cent. In the case of electricity produced in open-loop biomass facilities, small irrigation power facilities, landfill gas facilities, trash combustion facilities, and qualified hydropower facilities, section 45(b)(4)(A) requires the amount in effect under section 45(a)(1) (before rounding to the nearest 0.1 cent) to be reduced by one-half. Under the calculation required by section 45(b)(2), the credit for renewable electricity production for calendar year 2010 under section 45(a) is 2.15 cents per kilowatt hour on the sale of electricity produced from the qualified energy resources of wind, closed-loop biomass, geothermal energy, and solar energy, and 1.1 cent per kilowatt hour on the sale of electricity produced in open-loop biomass facilities, small irrigation power facilities, landfill gas facilities, trash combustion facilities, qualified hydropower facilities, marine and hydrokinetic renewable energy facilities. Under the calculation required by section 45(b)(2), the credit for refined coal production for calendar year 2010 under section 45(e)(8)(A) is \$6.27 per ton on the sale of qualified refined coal. The credit for steel industry fuel is \$2.87 per barrel-of-oil equivalent of steel industry fuel sold. The credit for Indian coal production for calendar year 2010 under section 45(e)(10)(B) is \$2.2 per ton on the sale of Indian coal.
