Background and Purpose

On August 30, 2007 the USCG published a Final Rule to implement amendments to the existing Regulated

Navigation Area (RNA) (2007 Final Rule) applicable to First Coast Guard District waters. (72 FR 50052; corrected by 72 FR 70780). The purpose of these amendments was to further reduce the probability of an incident that could result in the discharge or release of oil or hazardous material, or cause serious harm, to navigable waters of the United States. As part of the process to implement the 2007 Final Rule, the USCG prepared a Categorical Exclusion Determination as defined in its Agency Procedures for Implementing the National Environmental Policy Act. In a ruling on May 17, 2011, the 1st U.S. Circuit Court of Appeals determined that the USCG “failed to comply with its obligations under the National Environmental Policy Act” when it failed to prepare an Environmental Impact Statement (EIS) or an Environmental Assessment (EA).

The Coast Guard has completed a draft EA in order to cure the procedural deficiency. This analysis indicates that an Environmental Impact Statement (EIS) will not be necessary for implementation of any of the action alternatives. The Coast Guard anticipates that a Finding of No Significant Impact (FONSI) will be appropriate for implementation of the 2007 Final Rule preferred alternative.

We are seeking public input on the draft EA, including comments on the completeness and adequacy of the document, and on the measures and operating conditions described in the EA as alternatives designed to reduce or eliminate potential environmental impacts. The Coast Guard will consider public comments on the EA in determining the preferred alternative and whether to issue a Finding of No Significant Impact (FONSI), or to conduct additional NEPA analysis.

Dated: July 18, 2012.

D.B. Abel,

Rear Admiral, U.S. Coast Guard, Commander, First Coast Guard District.
