

We hereby presume as a factual matter, on a rebuttable basis, that earth station antennas included in the Appendix are not active antennas receiving in the 3.7 GHz band, or that the C-band earth station antennas associated with a given site, as reflected on the incumbent list, exceed the actual number of such antennas located at that site. Absent factual rebuttal from the earth station operator by August 10, 2022, these antennas would not satisfy the Commission's C-band transition rules that antennas must be operational C-band antennas entitled to interference protection in the 3.7 GHz band to qualify for incumbent status.⁸ For inactive earth stations, section 25.161(c) of the Commission's rules provides that an earth station authorization is automatically terminated if the station is not operational for more than 90 days.⁹ Where a registration lists more antennas than have been observed to exist at a site, the apparently non-existent antennas will be deemed never to have existed and, accordingly, will fail to qualify for incumbent status under the C-band transition rules. Similarly, antennas that operate in other bands but do not receive in the 3.7 GHz band would not qualify for incumbent status under the C-band transition rules.¹⁰

Incumbent earth station operators who need to affirm the continued operation of the identified earth station antennas. We direct earth station operators with incumbent earth station antennas that appear on the appended list to make either of two filings no later

should be terminated (assuming that the registrations are in fact duplicative), we do not include those registrations in the attachment to this Public Notice and they are not subject to the 90-day deadline for response. Following its normal processes, the Bureau will, however, follow up with the two registrants to determine whether the registrations are duplicative and, if so, which should be removed from the Incumbent List and from IBFS.

⁸ 47 CFR 25.138(c)(1). See note 4 *supra*. As noted above, note 2 *supra*, the earth station antennas listed in the Appendix hereto do not include those that are subject to lump sum elections. Those elections may include C-band antennas whose operators have decided to discontinue all use of the C-band by the end of the C-band transition.

⁹ 47 CFR 25.161(c). The Bureau has delegated authority to enforce the Part 25 rules. 47 CFR 0.261(a)(15).

¹⁰ For the latter two groups of antennas, we note that the following rules would apply: (1) section 25.162(c) and (e) of the Commission's rules provide that the interference protection of a receiving earth station is automatically terminated in certain circumstances, including when a station has been used less than 50% of the time during any 12-month period or when actual use of the facility is inconsistent with what is in a registrant's application, 47 CFR 25.162(c) & (e), and (2) section 25.115(b)(8) of the Commission's rules require earth station operators to take the steps necessary to remove non-operational antennas from the active records in the IBFS, 47 CFR 25.115(b)(8).

than 90 days after release of this Notice (*i.e.*, by August 10, 2022): (1) file to correct the IBFS filings for the affected antennas,¹¹ or (2) file in ECFS IB Docket No. 20–205 affirming that those antennas are operational antennas receiving in the 3.7 GHz band. An earth station operator may contact Bureau staff at IBFSINFO@fcc.gov if it has questions about the above or if it needs instructions on how to surrender entire Callsigns in IBFS, how to remove an inactive earth station antenna from a Callsign that includes other operational earth station antennas, or how to modify its Callsign to accurately reflect the bands used by an antenna.

Earth station operators with earth station antenna(s) on the attached list that do not respond by August 10, 2022, affirming operation of the identified earth station antennas in the 3.7 GHz band¹² will be deemed, based on the above presumptions, to have had either their authorizations to use the 3.7 GHz band for those antennas or their interference protection in the use of the 3.7 GHz band automatically terminated by rule. In those cases, the Bureau also will, as needed, terminate in IBFS those portions of the authorizations relating to the 3.7 GHz band and/or make changes in IBFS necessary to accurately reflect actual use of and interference protection for the relevant facilities. In addition, the Bureau will correct the incumbent earth station list by removing terminated earth station antennas and amending the list to no longer include any antennas in the list that are not operational C-band antennas, including over-registered antennas or antennas receiving in bands other than the 3.7 GHz band. Protection from interference from the network deployments of new wireless licenses and eligibility for reimbursement of any transition costs, including the cost of any filters, will be limited to those earth station antennas on the updated list.

Incumbent earth station operators who need to provide additional information to avoid harmful interference. As a reminder, while not subject to 90-days' notice, earth station operators that have not provided the necessary information to the Relocation Coordinator or satellite operators may

¹¹ In addition to the required filings in IBFS, those earth station operators may also make a filing in ECFS IB Docket No. 20–205 confirming the extent to which they are surrendering callsigns, removing antennas, or modifying callsigns in IBFS.

¹² Notwithstanding an affirmation of continued operation, the Bureau retains the authority to eliminate an earth station antenna's incumbent status if the Bureau receives additional evidence that the antenna has failed to satisfy applicable requirements for maintaining operation or is otherwise ineligible to be considered an incumbent.

not be successfully transitioned before terrestrial wireless licensees initiate service in the band.

Unless those earth station operators provide the necessary information, they will risk losing their rights to receive relocation assistance prior to the initiation of service in the band by the incoming terrestrial wireless licensees, as well as any rights to operate in the lower C-band at their current locations free of harmful interference that may occur as these licensees deploy their networks.
