

cars are eligible for importation into the United States. The vehicles which G&K believes are substantially similar are 1995–2000 Mazda Millenia passenger cars that were manufactured for importation into, and sale in, the United States and certified by their manufacturer as conforming to all applicable Federal motor vehicle safety standards.

The petitioner claims that it carefully compared 1995–2000 Mazda Xedos 9 passenger cars to 1995–2000 Mazda Millenia passenger cars, and found the vehicles to be substantially similar with respect to compliance with most Federal motor vehicle safety standards.

G&K submitted information with its petition intended to demonstrate that 1995–2000 Mazda Xedos 9 passenger cars, as originally manufactured, conform to many Federal motor vehicle safety standards in the same manner as 1995–2000 Mazda Millenia passenger cars, or are capable of being readily altered to conform to those standards.

Specifically, the petitioner claims that 1995–2000 Mazda Xedos 9 passenger cars are identical to 1995–2000 Mazda Millenia passenger cars with respect to compliance with Standard Nos. 102 *Transmission Shift Lever Sequence*, * * * 103 *Defrosting and Defogging Systems*, 104 *Windshield Wiping and Washing Systems*, 105 *Hydraulic Brake Systems*, 106 *Brake Hoses*, 109 *New Pneumatic Tires*, 113 *Hood Latch Systems*, 116 *Brake Fluid*, 118 *Power Window Systems*, 124 *Accelerator Control Systems*, 201 *Occupant Protection in Interior Impact* (petitioner states that the Millenia has not been certified by its manufacturer as conforming to the standard's upper interior head impact requirements), 202 *Head Restraints*, 203 *Impact Protection for the Driver from the Steering Control System*, 204 *Steering Control Rearward Displacement*, 205 *Glazing Materials*, 206 *Door Locks and Door Retention Components*, 207 *Seating Systems*, 209 *Seat Belt Assemblies*, 210 *Seat Belt Assembly Anchorages*, 212 *Windshield Retention*, 214 *Side Impact Protection*, 216 *Roof Crush Resistance*, 219 *Windshield Zone Intrusion*, 301 *Fuel System Integrity*, and 302 *Flammability of Interior Materials*.

Additionally, the petitioner states that 1995–2000 Mazda Xedos 9 passenger cars comply with the Bumper Standard found in 49 CFR Part 581.

Petitioner also contends that the vehicles are capable of being readily altered to meet the following standards, in the manner indicated:

Standard No. 101 *Controls and Displays*: (a) installation of a seat belt warning lamp that displays the required

seat belt symbol; (b) recalibration of the speedometer/odometer from kilometers to miles per hour; (c) replacement of the entire instrument cluster on most vehicles with an instrument cluster that displays the appropriate brake and other warning insignia in English.

Standard No. 108 *Lamps, Reflective Devices and Associated Equipment*: installation of U.S.-model headlamp assemblies and front sidemarkers.

Standard No. 110 *Tire Selection and Rims*: (a) inspection of all vehicles and replacement of any tires that do not bear DOT markings or are not of the same size and shape as those on U.S.-certified models; (b) installation of a tire information placard.

Standard No. 111 *Rearview Mirror*: inspection of all vehicles and replacement of any passenger side rearview mirrors that do not bear the required warning statement.

Standard No. 114 *Theft Protection*: installation of a warning buzzer microswitch in the steering lock assembly and a warning buzzer.

Standard No. 208 *Occupant Crash Protection*: (a) installation of a seat belt warning buzzer; (b) inspection of all vehicles and replacement of any driver's and passenger's side air bags and knee bolsters with part numbers that differ from those installed on U.S. certified models. The petitioner states that the vehicles are equipped with Type 2 seat belts in the front and rear outboard designated seating positions, and with a Type 1 seat belt in the rear center designated seating position.

The petitioner states that the vehicles are equipped with anti-theft devices which exempt them from the parts marking requirements of the Theft Prevention Standard at 49 CFR Part 541. The petitioner states that all vehicles will be inspected prior to importation, and that all anti-theft devices with part numbers that differ from those on U.S. certified models will be replaced.

The petitioner also states that a VIN plate must be affixed to the vehicle so that it can be read from the left windshield pillar, and a VIN reference label must be affixed to the edge of the door or to the latch post nearest the driver, to meet the requirements of 49 CFR Part 565.

Interested persons are invited to submit comments on the petition described above. Comments should refer to the docket number and be submitted to: Docket Management, Room PL-401, 400 Seventh St., SW, Washington, DC 20590. It is requested but not required that 10 copies be submitted.
