SUPPLEMENTARY INFORMATION:

Title: Accident Recordkeeping Requirements.

OMB Number: 2126-0009.

Background: The Federal Motor Carrier Safety Regulations (FMCSRs), at section 390.15 of title 49 of the Code of Federal Regulations (CFR), require motor carriers to make all records and information pertaining to crashes (accidents) available to an authorized representative or special agent of the FMCSA upon request or as part of an inquiry. For the purposes of § 390.15, the word "accident" is defined as an occurrence involving a commercial motor vehicle operating on a public road in interstate or intrastate commerce which results in: (1) A fatality; (2) bodily injury to a person who, as a result of the injury, receives medical treatment away from the scene of the accident; or (3) one or more motor vehicles incurring disabling damage as a result of the accident, requiring the motor vehicle to be transported away from the scene by a tow truck or other motor vehicle (49 CFR 390.5). Occurrences involving only boarding and alighting from a stationary motor vehicle or involving only the loading or unloading of cargo are not included in the definition.

Motor carriers are required to maintain an accident register for one year after the date of the accident. The register must include a list of each accident. The information for each accident must include, at a minimum, the following elements: date of accident; city or town in which or most near where the accident occurred and the State in which the accident occurred; driver name; number of injuries; number of fatalities; and whether hazardous materials, other than fuel spilled from the fuel tanks of motor vehicles involved in the accident, were released. In addition, the register must contain copies of all accident reports required by State or other governmental entities or insurers.

There are no prescribed forms. The records are used by the FMCSA and its representatives as a source of information for investigations or special studies, and to assess the effectiveness of motor carriers' safety management controls.

Respondents: Motor carriers.

Estimated Burden: The FMCSA estimates approximately 155,000 accidents involving trucks and 17,000 accidents involving buses as defined in section 390.5 of the FMCSRs occur annually (source: National Highway Traffic Safety Administration General Estimates System). Of these, approximately 80 percent involve trucks and buses operated by interstate motor

carriers. About 85 percent of the buses involved in crashes are school or transit buses and are not subject to this recordkeeping requirement. The number of accidents is therefore estimated to be 126,040 ($124,000 (0.80 \times 155,000) + 2,040 (0.80 \times 0.15 \times 17,000) = 126,040$).

The agency estimates it takes approximately 18 minutes for interstate motor carriers to collect and record the seven elements of information on the accident register. Based on these assumptions, the agency estimates a time burden of 37,812 hours ($126,040 \times 18 \text{ minutes divided by } 60 \text{ minutes}$) per year for accident report register information.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended; and 49 CFR 1.73.

Issued on: July 19, 2002.

Joseph M. Clapp,

Administrator.
