

Amendment 5 alternatives currently address adjustments to the fishery management program and reporting requirements for vessels and dealers, measures to address trip notification requirements, carrier vessels, and transfers of herring at-sea. It also may include a catch monitoring program that could maximize sampling and address net slippage, alternatives to allocate observer coverage on limited access herring vessels, river herring bycatch and criteria for midwater trawl vessel access to year-round groundfish closed areas.

Although other non-emergency issues not contained in this agenda may come before this Council for discussion, those issues may not be the subjects of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided that the public has been notified of the Council's intent to take final action to address the emergency.
