SUPPLEMENTARY INFORMATION: USACE is seeking public input on its proposed draft purpose and need statements for developing the Plan/EIS. The Plan is needed to fully implement the direction received in Subsection (a) of Section 5018 of the Water Resources Development Act of 2007; and address current trends indicating: diminished natural habitat; reduced populations of native species and communities; and reduced variability of physical processes such as flows, flooding, and sediment erosion/deposition. Therefore, the draft purpose of the Plan is to determine the actions required to mitigate losses of aquatic and terrestrial habitat; to recover federally listed species under the Endangered Species Act; and to restore the ecosystem to prevent further declines among other native species, while seeking to balance with social, economic, and cultural values for future generations. The overall goal of the planning process is to result in a sustainable decision that will guide mitigation, recovery, and restoration actions over the next 30 to 50 years.

In addition to seeking input on the proposed draft purpose and need for the Plan, the USACE is also seeking comments on what specific natural resources should be addressed and other issues that should be considered in this type of plan.

USACE is hosting public scoping meetings throughout the basin to address the plan purpose, need, and target resources. For specific information regarding these meetings (dates, locations, and times) please see <http://www.mrerp.org>.

All meetings are accessible to people with disabilities. Any individual with a disability who requires special assistance, such as a sign language interpreter, or a translator, please contact either project manager listed above at least 48 hours in advance of the meeting so that arrangements can be made.
