

funded programs aimed at STEM professional development and growth.

Estimate of Burden: At present, most education and training opportunities funded by NSF use applications that are submitted directly to each Site, if such applications are required as is the case with the REU Sites program. Sites might run competitive and noncompetitive applications to select their program participants. We estimate that individuals applying for noncompetitive Sites will spend 3.7 hours submitting information through the ETAP system; for competitive Sites, this estimate is 6.1 hours. We estimate that individuals writing letters of reference for students will spend 0.5 hours drafting a letter in support of a student's application to a competitive Site.

Respondents: Individuals.

Estimated Number of Respondents: 286,619.

Estimated Total Annual Burden on Respondents: 270,378 hours.

Discussion

On March 31, 2025, Long Mott Energy, LLC., a wholly owned subsidiary of the Dow Chemical Company, filed an application for a construction permit for a four-unit power reactor facility to be located in Calhoun County, Texas, pursuant to section 103 of the Atomic Energy Act, as amended, and part 50 of title 10 of the *Code of Federal Regulations* (10 CFR), "Domestic Licensing of Production and Utilization Facilities." The four-unit facility is to be identified as Long Mott Generating Station and would be based on the X-energy Xe-100, high-temperature gas-cooled reactor design. This would be the first application to include this design for NRC review.

The application is available in ADAMS under Package Accession No. ML25090A057. The information submitted by the applicant includes, among other things, the transmittal letter (ADAMS Accession No. ML25090A058), the preliminary safety analysis report (ADAMS Accession No. ML25090A061), the environmental

report (ADAMS Accession No. ML25090A063), and certain financial qualification information (ADAMS Accession No. ML25090A059). These notices are being provided in accordance with the requirements in 10 CFR 50.43(a)(3).

The NRC staff is currently undertaking its acceptance review of the application. If the application is accepted for docketing, a subsequent **Federal Register** notice will be issued that addresses the acceptability of the construction permit application for docketing and provisions for participation of the public in the permitting process.

Dated: April 29, 2025.
