II. Background

A. Purpose of the Meeting

Under the NAFTA, EPA and our Canadian counterpart, the Pest Management Regulatory Agency (PMRA), have conducted a joint review of aquatic and terrestrial plant tests and test methods. The existing data requirements and tests do not provide the information needed to adequately characterize risks to non-target plants. As an example, the number of plant species specified in the plant test guidelines need to be increased. In addition, tests are needed to assess plant reproduction and community impacts. The purpose of this session is to review non-target plant toxicity tests under NAFTA.

B. Panel Report

The Agency anticipates that the Panel's report of their recommendations

will be available approximately 60 days after the meeting. The Panel's report will be posted on the FIFRA SAP web site or may be obtained by contacting the PIRIB at the address or telephone number listed in Unit I. of this document.
