II. Discussion

NUREG-1307, Revision 16, "Report on Waste Burial Charges: Changes in Decommissioning Waste Disposal Costs at Low-Level Waste Burial Facilities," modifies the previous revision to this report issued in January 2013 (ADAMS Accession No. ML13023A030), and incorporates updates to the adjustment factors for the labor, energy, and waste components of the NRC minimum decommissioning fund formula. This revision also incorporates changes resulting from newly available low-level waste disposal capacity at the Andrews County, Texas facility established in 2012, and changes made to waste disposal costs resulting from a contractor reassessment of the assumptions for LLW classification. As a result of these changes, the minimum decommissioning fund formula amounts calculated by licensees, based on revised low-level waste burial factors presented in this report, will likely reflect (on average) lower minimum decommissioning fund requirements than those previously reported by licensees in 2015.

Dated at Rockville, Maryland, this 10th day of November 2016.

For the Nuclear Regulatory Commission.

Anthony R. Bowers,

Chief, Financial Analysis and International Projects Branch, Division of Inspection and Regional Support, Office of Nuclear Reactor Regulation.
