

Frequency of Response: On occasion reporting requirement.

Total Annual Burden: 188 hours.

Annual Reporting and Recordkeeping Cost Burden: \$19,000.

Needs and Uses: This rule section requires Specialized Mobile Radio (SMR) applicants who wish to locate co-channel systems less than 70 miles from an existing system operating on the same channel may do so upon a specific request. If the requested distance falls within the parameters of a table provided in the rules, the applicant must provide certain information about the co-channel stations, but no waiver of the short spacing rule is required. If the request is for distances less than those prescribed in the table, a waiver of the short spacing rule is required. Incumbent licensees seeking to utilize an 18 dBµ signal strength interference contour, and that are unsuccessful in obtaining the consent of affected co-channel incumbents, may submit to any certified frequency coordinator of 800 MHz band channels an engineering study showing that interference will not occur, together with proof that the incumbent licensee has sought consent. The incumbent may then provide to the Commission in their modified applications a statement from a certified frequency coordinator that no harmful interference will occur to a co-channel licensee. The Commission will submit this information collection to the OMB after the requisite 60 day comment period as an extension (no change) to obtain the full three year clearance.

The NPRM has proposed to provide detailed clarification of the AM, FM, and TV licensee's responsibilities in resolving/eliminating blanketing interference caused by their individual stations. The NPRM has also proposed to consolidate all blanketing interference rules under a new section 47 CFR 73.1630, "Blanketing Interference."
