

Documents Submission Procedures; APO Procedures (73 FR 3634). Those procedures apply to administrative reviews included in this notice of initiation. Parties wishing to participate in any of these administrative reviews should ensure that they meet the requirements of these procedures (e.g., the filing of separate letters of appearance as discussed at 19 CFR 351.103(d)).

These initiations and this notice are in accordance with section 751(a) of the Tariff Act of 1930, as amended (19 U.S.C. 1765(a)), and 19 CFR 351.221(c)(1)(i).

Dated: April 21, 2008.

Stephen J. Claeys,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XH46

Magnuson-Stevens Act Provisions; General Provisions for Domestic Fisheries; Application for Exempted Fishing Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for comments.

SUMMARY: The Assistant Regional Administrator for Sustainable Fisheries, Northeast Region, NMFS (Assistant Regional Administrator), has made a preliminary determination that an Exempted Fishing Permit (EFP) application submitted by David Beutel and Laura Skrobe of the University of Rhode Island (URI) contains all of the required information and warrants further consideration. The EFP would enable researchers to test an experimental net that uses very large mesh panels to increase escapement of cod relative to haddock by granting exemption from the Gulf of Maine (GOM) Rolling Closure Areas II and III. The Assistant Regional Administrator has made a preliminary determination that the activities authorized under this EFP would be consistent with the goals and objectives of the Northeast (NE) Multispecies Fishery Management Plan (FMP). However, further review and consultation may be necessary before a final determination is made to issue an EFP. Therefore, NMFS announces that the Assistant Regional Administrator

proposes to recommend that an EFP be issued that would allow two commercial fishing vessels to conduct fishing operations that are otherwise restricted by the regulations governing the fisheries of the Northeastern United States.

Regulations under the Magnuson-Stevens Fishery Conservation and Management Act require publication of this notification to provide interested parties the opportunity to comment on applications for proposed EFPs.

DATES: Comments must be received on or before May 12, 2008.

ADDRESSES: You may submit written comments by any of the following methods:

- Email: DA8-066@noaa.gov. Include in the subject line "Comments on Eliminator Trawl EFP."

- Mail: Patricia A. Kurkul, Regional Administrator, NMFS, NE Regional Office, 1 Blackburn Drive, Gloucester, MA 01930. Mark the outside of the envelope "Comments on Eliminator Trawl EFP."

- Fax: (978) 281-9135.

FOR FURTHER INFORMATION CONTACT:

Douglas Potts, Fishery Management Specialist, 978-281-9341.

SUPPLEMENTARY INFORMATION: A complete application for an EFP was submitted on April 2, 2008, by David Beutel and Laura Skrobe for a project entitled "Exploring Bycatch Reduction in the Haddock Fishery Through the Use of the Eliminator Trawl with Fishing Vessels in the 250 to 550 Horsepower Range" funded under the Northeast Region Cooperative Research Partnership Program. The study would conduct field testing of a new net design, referred to as the Eliminator Trawl, specifically scaled for vessels with 250 to 550 horsepower engines. This trawl net is equipped with very large mesh in selected portions of the body to increase escapement of cod and flatfish while retaining haddock. The original Eliminator Trawl, currently being considered as an additional gear in special programs in the NE multispecies fishery, is not designed to allow smaller powered vessels to utilize this net.

The EFP would exempt two vessels from the seasonal GOM Rolling Closure Areas II and III, as specified at 50 CFR 648.81(f)(1)(ii) and (iii), while conducting research trips. These closure areas are believed to provide the mix of species needed, while still being close enough to shore for the safe operation of these smaller vessels. The goal of the research is to demonstrate the efficiency of this net design to selectively target haddock. The applicants intend that, if

sufficiently effective, the gear be proposed by the New England Fishery Management Council for use in existing Special Access Programs (SAPs) or for the development of a new SAP in the study area.

Research trips would be conducted within 30-minute squares 132 and 133 and the vessels would conduct side-by-side tows. One vessel would fish with the experimental trawl and the other with a standard legal groundfish trawl. The experimental trawl net employs graduated webbing starting with 5 foot (1.524 m) meshes and ending with the legal minimum 6-inch (15.24-cm) mesh size in the body and 6.5-inch (16.51-cm) mesh in the codend. Each vessel would conduct four to six 1-hour tows per day over six days between the start of the EFP and May 30, 2008, and again between April 1 and May 30, 2009. The researchers believe the best mix of haddock, Atlantic cod, and flounders would be present in this area during this period. Overall, the total expected catch from both the experimental and commercial trawls would be:

Species	Estimated Catch
Atlantic Cod	14,400 lb (6,531.7 kg)
Haddock	30,000 lb (13,607.8 kg)
American Plaice	400 lb (181.4 kg)
Yellowtail Flounder	10 lb (4.5 kg)

Based on other previous research conducted in the proposed area and season, the researchers estimate that the vessels would catch less than 50 lb (22.7 kg) each of other regulated groundfish species, white hake, winter flounder, witch flounder, windowpane flounder, redfish, and pollock. The vessels would be charged A days-at-sea (DAS) during the research trips and would be subject to applicable size and possession limits. Undersized, or otherwise protected fish, would not be retained or landed. Legal sized fish would be landed and sold under normal NE multispecies DAS and other applicable regulations.

The applicant may request minor modifications and extensions to the EFP throughout the year. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate completion of the proposed research and have minimal impacts that do not change the scope or impact of the initially approved EFP request. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 22, 2008.

Emily H. Menashes

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Magnuson-Stevens Act Provisions; General Provisions for Domestic Fisheries; Application for Exempted Fishing Permit

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for comments

SUMMARY: The Regional Administrator, Southwest Region, NMFS has made a preliminary determination that an application for an Exempted Fishing Permit (EFP) warrants further consideration. The application was submitted to NMFS by a California-based commercial fisherman requesting an exemption for a single vessel from the longline fishing prohibitions within the U.S. Exclusive Economic Zone (EEZ) off the West Coast during the 2008 fishing year beginning mid-September 2008, or, if administrative delays occur, during the 2009 fishing year beginning mid-September 2009. The Regional Administrator has also made a preliminary determination that the activities authorized under the EFP would be consistent with the goals and objectives of the Fishery Management Plan for U.S. West Coast Fisheries for Highly Migratory Species (HMS FMP). However, further review and consultation is necessary before a final determination is made to issue the EFP. Therefore, NMFS proposes to review the EFP and requests public comment on the application. The application is available for review on the NMFS Southwest Region website: <https://swr.nmfs.noaa.gov/>.

DATES: Comments must be received by May 27, 2008.

ADDRESSES: You may submit comments on this notice, identified by "RIN 0648-XH38" by any of the following methods:

- E-mail: LonglineEFP.SWR@noaa.gov. Include the RIN in the subject line of the message.

- Mail: Rodney R. McInnis, Regional Administrator, Southwest Region, NMFS, 501 West Ocean Blvd., Suite 4200, Long Beach, CA 90802-4213.

- Fax: (562) 980-4047.

FOR FURTHER INFORMATION CONTACT:

Mark Helvey, Southwest Region, NMFS, (562) 980-4040.

SUPPLEMENTARY INFORMATION: An application for an EFP was submitted to the Pacific Fisheries Management Council (Council) by Peter Dupuy, a commercial fishing vessel owner, in March 2008. EFPs for fishing under the HMS FMP are governed by 50 CFR 600.745 and 660.718. The EFP would exempt a single vessel from following the gear and fishing restrictions at 50 CFR 660.712(a) implementing the HMS FMP that prohibit owners and operators of vessels registered for use of longline gear from using longline gear to fish for or target HMS within the U.S. EEZ. The applicant applied for the EFP with the intent to conduct an exploratory test fishery with a single vessel to gather information on the economic viability and environmental effects, including the potential impacts to protected species and non-target finfish interactions, of fishing for swordfish in the West Coast EEZ.

At its April 2008 meeting, the Council, with advice from its HMS Management Team and HMS Advisory Subpanel, adopted a preferred alternative for the EFP and forwarded that alternative to NMFS, recommending that the agency review the proposed EFP and, if consistent with Federal law, issue the permit. The Council recommended that the applicant be subject to a cap of one short-finned pilot whale and 12 striped marlin, and a prohibition for fishing off the State of Washington. The Council recommended that the fishery be managed through limits on the amount of incidental take of protected species that may be exposed to and adversely affected by this action. The limits will be established based upon Section 7 consultations under the Endangered Species Act by NMFS for marine mammals and sea turtles, and by the U. S. Fish and Wildlife Service for seabirds. If any one of the limits set by these consultations is reached by the fishery authorized by the EFP, the permit would be immediately revoked. The EFP would require 100 percent NMFS observer coverage. The Council's recommendations, described above, would be established as permit conditions.

If approved, the EFP would authorize a single vessel to longline fish in the EEZ off of Oregon and California. Under the proposed terms and conditions of the EFP, the vessel would target swordfish utilizing shallow-set longline gear which is set at a shallower depth

(<100 m) than deep-set longline gear which is typically set in the deeper thermocline zone (~300-400 m) for tunas. The applicant would be allowed a maximum of four trips between September and December, 2008, or between September and December, 2009, and a maximum of 14 sets per trip. Fishing would neither be allowed within 50 nautical miles of the coastline nor within the Southern California Bight. The Bight is defined in general terms as coastal waters from Point Conception in the north to just past San Diego in the south, and extending offshore of San Nicolas Island (Channel Islands National Marine Sanctuary waters would be excluded from the fishing area). The mainline may not exceed 100 km and no more than 1,200 hooks may be deployed per set. The applicant would be required to use 18/0 circle hooks with a 10° offset and mackerel or mackerel-type bait (as described at 50 CFR 665.33(f) and (g), respectively). To reduce potential interactions with seabirds, gear could not be set until one hour after local sunset and must be fully deployed before local sunrise. A certain percentage of the deployed gear would be required to be outfitted with time/depth recorders to measure fishing depth; the percentage would be determined by NMFS based on the amount of data needed to extrapolate the depth of all the hooks. The applicant would be required to use a NMFS-certified shark de-hooking device to improve the post-release survivability of incidentally captured sharks.

Aside from the exemptions described above, the vessel fishing under the EFP would be subject to all other regulations implementing the HMS FMP, including measures to protect sea turtles, marine mammals, and seabirds.

The EFP application would be effective for 2008 or 2009 only. In accordance with NOAA Administrative Order 216-6, an appropriate National Environmental Policy Act document will be completed prior to the issuance of the EFP. A draft Environmental Assessment on the EFP was presented to the Council and public in April 2008. Further review and consultation is necessary before a final determination is made to issue the EFP. As required in Section 7(a)(2) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*), NMFS will engage in formal consultation to determine if the proposed action is likely to jeopardize the continued existence and recovery of any endangered or threatened species or result in the destruction or adverse modification of critical habitat.
