

Section 96.17(d) requires that FSS Earth Station licensees register annually with the SAS to receive interference protection.

Section 96.21(a)(3) requires that existing commercial wireless broadband licensees operating in the band register in order to receive interference protection.

Sections 96.23(b); 96.33(b); 96.39(a)(1) and (c)–(e); 96.43(b); 96.45(d) require that the Citizens Broadband Radio Services Devices (CBSDs), which will operate on the Citizens Broadband Radio Service, must be registered with an SAS before use, provide specified information to the SAS, and adhere to certain operating parameters.

Section 96.35(e) requires that users operating Category B CBSDs must coordinate among each other and resolve interference through technological solutions or other agreements.

Sections 96.39(a) and (b) require that CBSDs report their geographic coordinates to an SAS automatically through the device or by a professional installer.

Sections 96.39(f) and (g) require that CBSDs incorporate sufficient security measures so that they are only able to communicate with the SAS and approved users and devices.

Section 96.41(d)(1) requires that licensees must report the use of an alternative Received Signal Strength Limit (RSSL) to the SAS.

Section 96.51 requires that manufacturers include a statement of compliance with the Commission's Radio Frequency (RF) safety rules with equipment authorization applications.

Sections 96.57(a)–(c); 96.59(a); 96.61 require that the SAS be capable of receiving registration and technical information from CBSDs, SASs, and ESCs, as well as employ secure communication protocols.

Section 96.63 requires that SAS Administrator applicants must demonstrate to the Commission that they are qualified to manage an SAS.

Section 96.67 requires that an Environmental Sensing Capability (ESC), used to protect federal radar systems from interference, may only operate after receiving Commission approval and be able to communicate information about the presence of a federal system and maintain security of the detected signals.

These rules which contain information collection requirements are designed to provide for flexible use of this spectrum, while managing three tiers of users in the band, and create a low-cost entry point for a wide array of users. The rules will encourage

innovation and investment in mobile broadband use in this spectrum while protecting incumbent users. Without this information, the Commission would not be able to carry out its statutory responsibilities.
