

review these records to confirm the contract quality requirements are being met. This review is risk-based and may or may not include the review of all quality assurance records. Generally, the records are more likely to be reviewed when the contractor is not meeting quality standards or as part of Government Contract quality assurance surveillance for complex requirements. Subject matter experts estimate these records are requested from 10 percent or fewer of contractors.

The information is used to assure that supplies and services provided under Government contracts conform to contract requirements.

- FAR 52.246–15, Certificate of Conformance. This clause requires the contractor to complete and sign a certificate of conformance (CoC). This clause is used in solicitations and contracts for supplies or services at the discretion of the contracting officer when it is in the Government's interest, small losses would be incurred in the event of a defect; or because of the contractor's reputation or past performance, or when it is likely that the supplies or services furnished will be acceptable and any defective work would be replaced, corrected, or repaired without contest.

- FAR 52.246–26, Reporting Nonconforming Items. This clause requires contractors to provide written notification to the contracting officer within 60 days of becoming aware or having reason to suspect, such as through inspection, testing, record review, or notification from another source (e.g., seller, customer, third party) that any end item, component, subassembly, part, or material contained in supplies purchased by the contractor for delivery to, or for, the Government is counterfeit or suspect counterfeit. This clause requires certain contractors to submit a report to the Government-Industry Data Exchange Program (GIDEP) system at www.gidep.org within 60 days of becoming aware or having reason to suspect, such as through inspection, testing, record review, or notification from another source (e.g., seller, customer, third party) that an item purchased by the contractor for delivery to, or for, the Government is a counterfeit or suspect counterfeit item; or a common item that has a major or critical nonconformance.

This information will be used by the Government to address and detect nonconforming and counterfeit items. Perhaps more important, this information will be available to businesses for searching prior to placing orders, thus enabling the avoidance of

purchasing counterfeit items in the first place.

The overarching goals of the formative evaluation are to understand the context in which the VHT–NC projects are implemented, the projects' goals, and the paths they take to achieve their goals. The proposed data collection will include semi-structured interviews with project staff, project participants, and key partners.

DATES: *Comments due within 60 days of publication.* In compliance with the requirements of the Paperwork Reduction Act of 1995, ACF is soliciting

The purpose of the proposed data collection is to obtain a comprehensive understanding of the VHT–NC projects and their communities, including implementation strengths and challenges. The proposed data collection will include semi-structured interviews with VHT–NC project staff, project participants (adults who have received assistance from the VHT–NC project), and key project partners. Interviews with project staff and partners will be conducted individually or, if appropriate and requested by respondents, in small groups. Interview topics will include community context, project goals and design, organizational and staff characteristics, partnerships, outreach and identification approaches, case management and service provision, survivor engagement, and community training. Interviews with project participants will be conducted individually. Participant interviews will focus on the project services and assistance received by participants, including those most helpful to healing and recovery.
