Continuation of Antidumping Duty Order: Glycine from the People's Republic of China

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of continuation of antidumping duty orders: Glycine from the People's Republic of China

SUMMARY: On June 8, 2000 the Department of Commerce ("the Department"), pursuant to sections 751(c) and 752 of the Tariff Act of 1930, as amended ("the Act"), determined that revocation of the antidumping duty order on glycine from the People's

Republic of China ("PRC") would be likely to lead to continuation or recurrence of dumping (65 FR 36405). On July 12, 2000, the International Trade Commission ("the Commission"), pursuant to section 751(c) of the Act, determined that revocation of the antidumping duty order on Glycine from PRC would be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time (65 FR 43037). Therefore, pursuant to 19 CFR 351.218(f)(4), the Department is publishing notice of the continuation of antidumping duty order on Glycine from the PRC.

EFFECTIVE DATE: July 25, 2000.

FOR FURTHER INFORMATION CONTACT: Eun W. Cho or James Maeder, Office of Policy for Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Ave., NW, Washington, D.C. 20230; telephone: (202) 482-1698 or (202) 482-3330, respectively.

SUPPLEMENTARY INFORMATION:

Background

On February 3, 2000, the Department initiated, and the Commission instituted, sunset reviews (65 FR 5308 and 65 FR 5371, respectively) of the antidumping duty order on glycine from the PRC, pursuant to section 751(c) of the Act. As a result of its review, the Department found that revocation of the antidumping duty order would be likely lead to continuation or recurrence of dumping and notified the Commission of the magnitude of the margins likely to prevail were the order to be revoked.¹

On July 12, 2000, the Commission determined, pursuant to section 751(c) of the Act, that revocation of the antidumping duty order on glycine from the PRC would be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time (see, Glycine From China, 65 FR 43037 (July 12, 2000) and USITC Publication 3315, Investigation No. 731-TA-718 (Review) (June 2000)).

Scope

The product covered by this order is glycine, which is a free-flowing crystalline material, like salt or sugar. Glycine is produced at varying levels of purity and is used as a sweetener/taste enhancer, a buffering agent, re-absorbable amino acid, chemical
