SUPPLEMENTARY INFORMATION: Itafos Conda LLC has submitted a Mine and Reclamation Plan (MRP) for agency review for Federal phosphate leases IDI-8289, IDI-05549, I-04 and IDI-0678 and a proposed modification (enlargement) of lease IDI-05549 at the proposed Husky 1 North Dry Ridge Phosphate Mine in Caribou County, Idaho. The BLM, as the Federal lease administrator, is the lead agency, and the USFS is the co-lead agency for preparing the EIS. The U.S. Army Corps of Engineers, Idaho Department of Environmental Quality, Idaho Department of Lands, and Idaho Governor's Office of Energy and Mineral Resources are cooperating agencies.

The Proposed Action would mine the Federal phosphate leases as outlined in the Draft EIS. The Draft EIS evaluates alternatives to the proposed action, including a no action alternative, and addresses issues identified during public scoping.

The BLM and USFS will make separate but coordinated decisions related to the proposed project. The BLM will approve, approve with modifications, or deny the MRP and lease modification. The BLM will base its decisions on public and agency input, any recommendations the USFS may have regarding surface management of leased National Forest System lands, and the Final EIS. The USFS will make recommendations to the BLM concerning surface management and mitigation on leased lands within the CTNF and will issue decisions on Special Use Authorizations for off-lease mine support activities. A Forest Plan amendment would also be necessary as outlined in the Draft EIS.

On December 23, 2020, the agencies published a Notice of Intent to prepare an EIS in the **Federal Register** initiating a 30-day public scoping period. The scoping process identified concerns related to impacts to water resources and watersheds from potentially elevated levels of selenium; effects to air quality, human health and safety, socioeconomics, and wildlife; reclamation and financial assurance; and mitigation and monitoring of mine operations.

The agencies have planned a virtual public meeting to summarize the document and answer questions. The date, time, and instructions for attending the virtual public meeting will be announced on the project websites.

Comments regarding the adequacy of the Draft EIS must be submitted by December 6, 2021. To assist the BLM and the USFS in identifying issues and concerns related to this project, comments should be as specific as possible.

Note that the portion of the proposed project related to Special Use Authorizations for off-lease activities is subject to the USFS objection process. This proposed project may be subject to the pre-decisional administrative review process pursuant to 36 CFR 218 subparts A and B because Forest Plan amendments may be needed. Only those who provide comment during this comment period or who have previously submitted specific written comments on the Proposed Action, either during scoping or other designated opportunity for public comment, will be eligible as objectors (36 CFR 218.5(a) and 219.53 (a)). Appeal procedures found in 43 CFR 4 apply to any BLM decision on the MRP or lease modification related Federal mineral leases.

While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.
