Annual Census of Patient Characteristics in State and County Mental Hospital Inpatient Services (0930-0093, Revision)—The Annual Census, which is conducted by SAMHSA's Center for Mental Health

Services (CMHS), is a complete enumeration of all State and county mental hospitals and collects aggregate information by age, gender, and diagnosis for each State on the number of additions during the year and resident patients who are physically present for 24 hours per day in the inpatient service at the end of the reporting year. First conducted in 1840, the Census has provided information

throughout the years that is not available from any other sources.

The Census is the primary means within CMHS for assessing de-institutionalization practices of State and county mental hospitals. Effective with the 2000 Census, two tables are being added to obtain patient race/ethnicity by diagnostic grouping for additions and resident patients. The annual burden estimate is shown in the table below.

	Number of respondents	Responses/respondent	Burden/response (hours)	Annual burden (hours)
State Statisticians and Superintendents of State Mental Hospitals	52	1	2	104
