

strength of the plastic does not allow the blocks to be over-tightened when secured with cargo securement devices, while wood can be over-tightened, can crack and can become loose in transit. For the reasons stated above, Truckmovers requests that its operators be permitted to use the ultra-high molecular polyethylene plastic support blocks to increase the height of a towed vehicle in driveaway-towaway operations, instead of utilizing hardwood blocks as specified in the current regulation. Truckmovers believes that the use of ultra-high molecular polyurethane plastic blocks, in lieu of hardwood support blocks, will maintain a level of safety that is equivalent to the level of safety achieved without the exemption.

Request for Comments

In accordance with 49 U.S.C. 31315 and 31136(e), FMCSA requests public comment from all interested persons on Truckmovers application for an exemption from 49 CFR 393.73(k)(4). All comments received before the close of business on the comment closing date indicated at the beginning of this notice will be considered and will be available for examination in the docket at the location listed under the **ADDRESSES** section of this notice.

Comments received after the comment closing date will be filed in the public docket and will be considered to the extent practicable. In addition to late comments, FMCSA will continue to file relevant information in the public docket that becomes available after the comment closing date. Interested persons should continue to examine the public docket for new material.
